Donald went to New Zealand for a holiday with his parents. At Taupo, there was an exciting prawn fishing center. His father and he bought the passes for NZD 25 each and went fishing for prawn. They decided to have a competition amongst themselves and noted their prawn catch hourly to see who caught more.

1. In the first hour, Donald caught 17 and his father caught 22. How many prawns did they catch in the first hour altogether?

2. In the second hour, Donald caught 23 and his father caught 12. How many prawns did they catch in the second hour altogether?

3. In the third hour, Donald caught 24 and his father caught 27. How many prawns did they catch in the third hour altogether?

4. In the fourth hour, Donald caught 20 and his father caught 20. How many prawns did they catch in the fourth hour altogether?

5. How many prawns did they catch each in four hours and how many prawns did they catch altogether?

Math First Grade Multi Step Word Problems:

Making Sense of Word Problems Eric de Corte, Brian Greer, Lieven Verschaffel, 2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems In Part One a wide range of examples documenting the strength of the phenomenon is reviewed Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre This theoretical shift is reflected in Part Two A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions about and strategies for doing word problems Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum **Mathematics Strategies**

Handbook of International Research in Mathematics

Education Lyn D. English, 2002-03 This state of the art Handbook brings together important mathematics education research that makes a difference in both theory and practice research that anticipates problems and needed knowledge before they become impediments to progress interprets future oriented problems into researchable issues presents the implications of research and theory development in forms that are useful to practitioners and policymakers and facilitates the development of research communities to focus on neglected priorities or strategic opportunities The volume represents a genuine attempt by contributors from around the world to advance the discipline rather than simply review what has been done and what exists The Handbook was developed in response to a number of major global catalysts for change including the impact of national and international mathematics comparative assessment studies the social cultural economic and political influences on mathematics education and research the influence of progressively sophisticated and available technology and the increasing globalization of mathematics education and research From these catalysts have emerged specific priority themes and issues for mathematics education research in the 21st century Three key themes were identified for attention in this volume life long democratic access to powerful mathematical ideas advances in research methodologies and influences of advanced technologies Each of these themes is examined in terms of learners teachers and learning contexts with theory development as an important component of all these aspects Dynamic and forward looking the Handbook of International Research in Mathematics Education is distinguished by its focus on new and emerging theoretical models perspectives and research methodologies its uniformly high standard of scholarship and its emphasis on the international nature of mathematics education research It is an essential volume for all researchers professionals and students interested in mathematics education research in particular and more generally in international developments and future directions in the broad field of educational research
