Pradhan,2020-12-03 The recent socio political changes in Nepal have brought assimilationist notions of Nepali nationalism under a tight scrutiny and drawn attention to more plural inclusive and diverse notions of Nepaliness However both assimilationist and pluralist visions continue to remain normative in their approach and often posit ethnic and national identity in opposition to each other Drawing on the everyday practices in the two schools this book illustrates that social actors in minority language education did not necessarily select between minority identity and national identity but instead made simultaneous claims to more than one social identity by discursively positioning ethnic identity as national identity It builds on the notion of simultaneity to illustrate that it is through the unresolved co presences of apparently contradictory ways that people maintain their multi layered identities By arguing for an analytical necessity to adopt relational approach it aims to complicate the neat compartmentalisation of identities **CTET Success Master Maths & Science Paper-2 for Class 6 to 8 2020** Arihant Experts,2020-01-02

Religious Schools in Europe Marcel Maussen, Floris Vermeulen, Michael Merry, Veit Bader, 2017-10-02 The European Convention on Human Rights guarantees freedom of education including the opportunities to create and operate faith based schools However as European societies become more religiously diverse and less religious at the same time the role of faith based schools is increasingly being contested Serious tensions have emerged between those who ardently support religious schools in their various forms and those who oppose them Given that faith based schools enjoy basic constitutional guarantees in Europe the controversy around them often surrounds issues of public financing degrees of organisational and pedagogical autonomy and educational practices and management This volume is about the controversies surrounding religious schools in a number of Western European countries The introductory chapter briefly analyses the structural pressures that affect the position of religious schools outlining the relevant institutional arrangements in countries such as Denmark Germany France Ireland the Netherlands and Scotland The following chapters provide a detailed analysis of the discussions and controversies surrounding faith based schools in each country Finally the two concluding chapters aim to provide a bigger comparative picture with regard to these debates about religious education in liberal democratic states and culturally pluralist societies This book was originally published as a special issue of Comparative Education
