Teaching to Exceed the English Language Arts Common Core State Standards Richard Beach,Amanda Haertling Thein,Allen Webb,2012-06-25 As the new English Language Arts Common Core State Standards take hold across the United States the need grows for pre service and in service teachers to be ready to develop curriculum and instruction that addresses their requirements This timely thoughtful and comprehensive text directly meets this need It delineates a literacy practices and critical engagement curriculum framework for 6 12 English language arts education that explains and illustrates how the Standards highest and best intentions for student success can be implemented from a critical culturally relevant perspective that is firmly grounded in current literacy learning theory and research The first 6 12 English language arts methods text to be aligned with the Standards this book also addresses their limitations formalist assumptions about literacy learning limited attention to media digital literacies lack of attention to critical literacies and questionable assumptions about linking standards and text complexity to specific grade levels Specific examples of teachers using the literacy practices critical engagement curriculum framework in their classrooms shows how these limitations can be surpassed Features Moves the CCSS framework into a view that literacy is a contextualized social practice Challenges simplistic models that homogenize adolescent learners Adds the important element of critical literacy to English language arts classrooms Provides specific examples of teachers in action implementing these practices Interactive Companion Website with student and instructor resources The Website is designed to foster interactivity through participation in an online teaching planning simulation with a text video or case on one side of the screen and a chat box for instructors and students to share their reactions and planning ideas The Companion Website is linked to a wiki that serves as a repository for links activities units and further reading South African Schooling: The Enigma of Inequality Nic Spaull,Jonathan D. Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full

range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
