Reinventing STEM in Early Childhood Education Eugene Geist,2025-05-09 Teaching STEM to young children is about more than helping them learn their numbers and facts It is an important and complex process that to be effective should honor the way children s brains are developing This book outlines how early childhood educators can best support young children s STEM journeys as children naturally take in information about their environment synthesize it and grow in the process This comprehensive text details different theories of learning research on how young brains develop practical information on preparing your environment and yourself for teaching STEM to children guidance for supporting diverse populations of students and developmental guidelines sample standards resources and lesson plans Organized chronologically the book connects relevant STEM topics with each developmental age range and outlines common school standards for each grade Reinventing STEM in Early Childhood Education is meant to be a core text for preservice teachers in math and science methods courses and is also important reading for teacher educators and professional development programs

Learning and Teaching Early Math Douglas H. Clements,Julie Sarama,2009-04-01 In this important new book for pre and in service teachers early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers become more effective professionals By opening up new windows to seeing young children and the inherent delight and curiosity behind their mathematical reasoning learning trajectories ultimately make teaching more joyous They help teachers understand the varying level of knowledge and thinking of their classes and the individuals within them as key in serving the needs of all children In straightforward no nonsense language this book summarizes what is known about how children learn mathematics and how to build on what they know to realize more effective teaching practice It will help teachers understand the learning trajectories of early mathematics and become quintessential professionals

Building Blocks Gene I. Maeroff,2025-09-23 A student s entire journey along the educational

spectrum is affected by what occurs and crucially by what does not occur before the age of eight or nine Yet early learning has never received the attention it deserves and needs In his latest book education expert Gene Maeroff takes a hard look at early learning and the primary grades of schooling Building Blocks offers a concrete and groundbreaking strategy for improving early education Filled with colorful descriptions and anecdotes from Maeroff's visits to schools around the country Building Blocks creates a rich portrait of education in America ranging from math lessons imported from Singapore in Massachusetts to serious but joyful kindergartens in California He speaks of the need for schools to prepare for the burgeoning enrollment of youngsters from immigrant families and for all children to acquire the habits and dispositions that will make them committed and productive students Maeroff issues a call to action for policy makers and parents alike
