Leading and Parenting of Teenage Kids in the Digital Era Dr. Siddhartha Ganguli,2021-02-10 The physical features of
teenage kids change to catch up with their brain circuits ready to take on the pre historic hunter gatherer roles The goal
resource mobilisation for survival Resource mobilisation would not only help them survive but also to earn them invisible
rewards by way of positive brain chemicals and electricity However the post industrialisation scenario has been quite
different Teenagers get groomed via skill or academic development to take on economic roles latest by their mid twenties
Such grooming strategy does not always lead to the invisible rewards which they would have earned had they been playing
their pre historic hunter gatherer roles Most interestingly today s versatile digital gadgets offer ample scope for earning
brain rewards at the cost of sedentary lifestyles The prevailing work and study from home culture has prompted the
teenagers becoming dependent on digital technology and getting addicted to the gadgets for earning rewards There is thus a
new need for the parents of today s teenagers They must smartly lead themselves and their kids so that digital technology is
utilised for their healthy all round development thus preventing any possibility of addiction Divided into two parts the Part 1
of this book throws light on the realities combined with tips and Part 2 introduces the new concept of Brain Tools for the use
of the kids and the parents based on the author s ongoing research on Neuro management NM *Indian National*
