Handbook of Energy Efficiency in Buildings Umberto Desideri, Francesco Asdrubali, 2018-11-12 Handbook of Energy Efficiency in Buildings A Life Cycle Approach offers a comprehensive and in depth coverage of the subject with a further focus on the Life Cycle The editors renowned academics invited a diverse group of researchers to develop original chapters for the book and managed to well integrate all contributions in a consistent volume Sections cover the role of the building sector on energy consumption and greenhouse gas emissions international technical standards laws and regulations building energy efficiency and zero energy consumption buildings the life cycle assessment of buildings from construction to decommissioning and other timely topics The multidisciplinary approach to the subject makes it valuable for researchers and industry based Civil Construction and Architectural Engineers Researchers in related fields as built environment energy and sustainability at an urban scale will also benefit from the books integrated perspective Presents a complete and thorough coverage of energy efficiency in buildings Provides an integrated approach to all the different elements that impact energy efficiency Contains coverage of worldwide regulation LEED v4 Practices, Certification, and Accreditation Handbook Sam Kubba, 2015-11-30 LEED v4 Practices Certification and Accreditation Handbook Second Edition provides users with a practical user friendly roadmap that presents the guidelines for selecting the LEED v4 rating system to better fit a particular project e g LEED for Building Design and Construction LEED for Operations and Maintenance LEED for Interior Design and Construction LEED for Building Design and Construction or LEED for Neighborhood Development In addition this comprehensive handbook carefully explains the modifications in the credentialing process including the new 3 Tier system requiring applicants to first take the LEEDTM Green Associate exam followed by the LEEDTM Professional Accreditation exam Practical strategies and guidelines for applying LEED v4 project certification Annotated tables checklists charts and references to quantum leap LEED v4 Includes case studies with special focus is put on key areas where most errors occur Demystifies LEED v4 requirements for project as well as personal professional LEED Certification Appendixes including sample exam questions acronyms and abbreviations and a glossary Biomimicry and Sustainable Building Performance Olusegun Aanuoluwapo Oguntona, Clinton Ohis Aigbavboa, 2024-02-01 This book on biomimicry assessment tools studies the concepts of sustainability sustainable construction practices and the evaluation categories that constitute a sustainability assessment tool By exploring and drawing lessons from biomimicry principles the book provides a nature inspired assessment tool to aid and guide the sustainable transformation of the built environment The book encapsulates the attributes of the conceptualised biomimicry assessment tool which is aimed at helping practitioners regulatory bodies and governmental and non governmental agencies in greening the built environment Owing to the dire need for country specific and tailor made tools that address developing countries needs this book serves as a practical reference and theoretical springboard for the development of sustainability assessment tools for the built environment Furthermore the book serves as

a guide in navigating the path towards achieving the greening agendas of the built environment and other sectors and seeks to align the new biomimicry assessment tool with the UN Sustainable Development Goals SDGs It is important reading for academics professionals and advanced students in the built environment engineering and sustainable development *Green Building Costs* Ming Hu,2023-08-08 Sustainability has become a driver of innovation in the built environment but the affordability of sustainable building remains a significant challenge This book takes a critical view of the real cost of green building It provides readers with a non biased evaluation based on empirical construction cost data and sheds light on the affordability of sustainable buildings Chapters are presented in three parts The first part lays the foundation to demystify the perception of green buildings being expensive to construct by providing empirical evidence that green buildings even net zero buildings are not necessarily more expensive to build than conventional buildings The second part presents empirical evidence common misperceptions of a higher green building construction cost are debunked The author offers a new framework to explain the construction cost drivers and differences of sustainable buildings the project characteristics and project team characteristics human factors The third part directs the readers attention to the important role that human factors play in controlling and reducing construction costs with a focus on the project design team A lack of skills expertise and experience during the design phase is likely to be the biggest contributor to higher construction costs Empirical analysis case studies on LEED certified buildings and interviews with project teams are used to present a pathway to more affordable green building at the end This will be a crucial resource for students and professionals in architecture engineering construction management and planning and energy policy **Green Building in Developing Countries** Zhonghua Gou,2019-07-30 The book reveals how green buildings are currently being adapted and applied in developing countries It includes the major developing countries such as China Indonesia Malaysia Thailand Pakistan Cambodia Ghana Nigeria and countries from the Middle East and gathers the insights of respected green building researchers from these areas to map out the developing world s green building revolution The book highlights these countries contribution to tackling climate change emphasising the green building benefits and the research behind them The contributing authors explore how the green building revolution has spread to developing countries and how national governments have initiated their own green building policies and agendas They also explore how the market has echoed the green building policy and how a business case for green buildings has been established In turn they show how an international set of green building standards in the form of various techniques and tools has been incorporated into local building and construction practices In closing they demonstrate how the developing world is emerging as a key player for addressing the energy and environmental problems currently facing the world The book helps developers designers and policy makers in governments and green building stakeholders to make better decisions on the basis of global and local conditions It is also of interest to engineers designers facility managers and researchers as it provides a holistic picture of how the industry is responding to the worldwide call for greener and more

sustainable buildings **Developing A Body Of Knowledge For Green Construction Project Management** Amos Darko, Albert P C Chan, 2024-09-10 Growing global imperatives to address sustainability concerns have boosted the importance and prominence of green construction projects worldwide However project managers may lack the specialist knowledge and or technical skills to overcome the unique challenges to successfully deliver suitably sustainable green projects This book aims to address this shortfall by unearthing refining and synergising the hitherto scattered gems of experiential and theoretical knowledge into a unified Body of Knowledge for green construction project management Comprising both conceptual principles as well as practical case studies this book for the first time assembles structures and consolidates a comprehensive body of knowledge for green construction project management that addresses the unique aspects of this critical domain It will fulfil a now critical need equipping industry practitioners researchers and students with the core project management knowledge and skills needed to successfully deliver green construction projects It is a must read for anyone who seeks to develop core green construction project management knowledge and skills and those intending to move into green construction project management Engineering Design and Mathematical Modelling Nnamdi Nwulu, Mammo Muchie, 2020-12-17 Engineering Design and Mathematical Modelling Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains Engineering design and mathematical modelling are key tools techniques in the Science Technology and Innovation spheres Whilst engineering design is concerned with the creation of functional innovative products and processes mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena Both of these can be useful tools for spurring and hastening progress in developing countries They are also areas where Africa needs to skill up in order to build a technological base The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling This book was originally published as a special issue of the African Journal of Science Technology Innovation and Development Introduction to Sustainability for Engineers Toolseeram Ramjeawon, 2020-02-13 Introduction to Sustainability for Engineers aims to incorporate sustainability into curricula for undergraduate engineering students The book starts with an introduction to the concept of sustainability outlining core principles for sustainable development to guide engineering practice and decision making including key tools aimed at enabling measuring and communicating sustainability It also describes concepts as life cycle assessment environmental economics related institutional architecture and policy framework business context of sustainability and sustainable buildings and infrastructure Appendices at the end of the book presents a summary of key concepts strategies and tools introduced in the main text Five Key Benefits A comprehensive textbook for engineering students to develop competency in sustainability Presents a framework for engineers to put sustainability into practice Presents the link between sustainability and the design process It shows the application of a sustainable engineering design process for putting sustainability into practice There are

well woven case studies and links to websites for learning in various engineering disciplines Includes challenging exercises at the end of each chapter that will inspire students and stimulate discussion in the class
