Handbook of Industrial Drying, Fourth Edition Arun S. Mujumdar, 2014-07-11. By far the most commonly encountered and energy intensive unit operation in almost all industrial sectors, industrial drying continues to attract the interest of scientists, researchers, and engineers. The Handbook of Industrial Drying, Fourth Edition, not only delivers a comprehensive treatment of the current state of the art but also serves as a consultative reference for streamlining industrial drying operations. New to the Fourth Edition: Computational fluid dynamic simulation; Solar impingement and pulse combustion drying; Drying of fruits, vegetables, sugar, biomass, and coal; Physicochemical aspects of sludge drying; Life cycle assessment of drying systems. Covering commonly encountered dryers as well as innovative dryers with future potential, the Handbook of Industrial Drying, Fourth Edition, not only details the latest developments in the field but also explains how improvements in dryer design and operation can increase energy efficiency and cost effectiveness. *Guidelines for Safe Handling of Powders and Bulk Solids* CCPS (Center for Chemical Process Safety), 2010-08-13. Powders and bulk solids handled widely in the chemical, pharmaceutical, agriculture, smelting, and other industries present unique fire, explosion, and toxicity hazards. Indeed, substances which are practically inert in consolidated form may become quite hazardous when converted to powders and granules. The U.S. Chemical Safety and Hazard Investigation Board is currently investigating dust explosions that occurred in 2003 at WestPharma, CTA Acoustics, and Hayes Lemmerz and is likely to recommend that companies that handle powders or whose operations produce dust pay more attention to understanding the hazards that may exist at their facility. This new CCPS guidelines book will discuss the types of hazards that can occur in a wide range of process equipment and with a wide range of substances and will present measures to address these hazards. **Handbook of Powder Technology** J.
