This is a story about six men who went to a medical college in Texas during the 1970s It is blackly humorous and often shocking as it examines the hidden side of medical education and its effects on the lives of students and patients in a university hospital Those who read it may never again feel quite the same about doctors The main character has enrolled in order to avoid military service during the Vietnam War thus he sees medical school from the unique viewpoint of an insider who as yet has no desire to become part of the system He soon finds himself locked in a fiercely competitive academic struggle that absorbs and eventually obsesses him When the war ends he is halfway through the program No longer able to walk away he decided to stay on He makes a promise to himself to retain his individuality and to never become an apologist for the establishment In spite of this he is gradually corrupted and becomes involved in some very questionable activities Finally the protagonist reaches his turning point and acts to expose a case of human experimentation whose subjects/patients on a cancer ward have not given their informed consent His medical career ends when he is cast out as a result of what has probably been the first moral act of his life 100 Questions & Answers About Colorectal Cancer David Bub,Susannah Rose,Douglas Wong,2007-07 The only text to provide both the patient's and doctor's views this invaluable resource provides up to date authoritative practical answers to the most common questions This book is an invaluable resource for anyone coping with the physical and emotional turmoil of this frightening disease *The A to Z of Ethics* Harry J.
