

KING KMA 24/24H

Silver Crown Audio Control System with 3-Light Marker Beacon Receiver or 5-Station Voice Activated Intercom

These compact TSO'd consoles make audio control "push-button simple."

Push-button simplicity puts complete, flexible audio control right at your fingertips with King's easy-to-use KMA 24 and KMA 24H systems.

Each is self-contained, all solid-state and stands only 1.3 inches high in your Silver Crown stack. The "slant top" package allows for the top slot in your instrument panel.

The KMA 24 controls as many as three transmitters and six receivers, including the internal marker beacon receiver and its automatically dimmed 3-light presentation. The KMA 24H controls up to five transmitters and five receivers, or four transmitters and six receivers.

The KMA 24H replaces the internal marker beacon receiver with an intercom which provides unprecedented flexibility. The intercom features capability for hot mic,

voice activation (VOX) or keyed activation of up to five intercom stations. In hot mic operation, all intercom microphones remain active at all times whether the operator is talking on intercoms or not. Voice activated operation has the microphone active only when the operator begins to talk. In keyed operation, the operator must depress a separate intercom switch to activate the microphone for intercom usage.

When two KMA 24Hs are installed, dual transmit flexibility is provided—allowing the pilot and copilot or another crewmember to talk on different transmitters simultaneously while providing pilot priority if the same transmitter is keyed by both crewmembers at the same time. Other features of the KMA 24H include a voice recorder compatibility and an emergency mode which directly connects the pilot's headphones and microphone directly to COM 1 in the event of a KMA 24H failure or a power interruption to the KMA 24H.

The KMA 24 and KMA 24H provide transmitter and receiver outputs to speaker or headphones or both. A separate isolation amplifier for headphones maintains constant, noise-free volume levels, even when several receivers are monitored at once. Keying a mic mutes all receivers automatically to eliminate bothersome feedback.

King offers the KMA 24 in four configurations and KMA 24H in two configurations so you can choose the one that best matches your requirements.

You'll find more detailed information, specifications, and a convenient test-out Pilot's Guide for both units on the following page.
