

MATH COMMON CORE 1ST GRADE

in Grade 1, instructional time should focus on four critical areas: (1) developing understanding of addition, subtraction, and strategies for addition and subtraction within 20; (2) developing understanding of whole number relationships and place value, including grouping in tens and ones; (3) developing understanding of basic measurement and measuring lengths by joining length units; and (4) reasoning about attributes of and composing and decomposing geometric shapes.

- Students develop strategies for adding and subtracting whole numbers based on their prior work with small numbers. They use a variety of models, including discrete objects and length-based models (e.g., rulers connected to foot lengths, 10-linked sets of, 100-linked sets, 1000-linked sets, and comparison blocks), and comparison strategies for the comparison of addition and subtraction, and to develop strategies for solving problems with these operations. Students understand connections between counting and addition and subtraction (e.g., adding one is the same as counting on one). They use properties of addition to add whole numbers, and the order and size relationships of multiplication strategies based on these properties (e.g., "making tens") to solve addition and subtraction problems within 20. By comparing a variety of solution strategies, students build their understanding of the relationship between addition and subtraction.
- Students develop fluency and use efficient, accurate, and generalizable methods to add within 20 and subtract multiples of 10. They compare whole numbers (at least to 100) to develop understanding of and solve problems involving their relative sizes. They think of whole numbers between 10 and 100 in terms of tens and ones, mentally representing the number 10, or 10 as composed of a ten and some ones. Through activities that compare numbers, they understand the order of the counting numbers and their relative magnitudes.
- Students develop an understanding of the meaning and process of measurement, including understanding concepts such as: forming the mental picture of building up the length of an object with equal-sized units; and the consistency provided for solving measurement.
- Students compare and describe shapes in solid figures (e.g., flat two-dimensional figures to make a quadrilateral) and build understanding of part-whole relationships as well as the properties of the original and composed shapes. As they partition shapes, they recognize them from different perspectives and orientations, describe their geometric attributes, and determine how they are alike and different, to describe the background for measurement and for initial understandings of properties such as congruence and symmetry.

Grade 1 Domains

Operations and Algebraic Thinking

- Represent and solve problems involving addition and subtraction.
- Understand and apply properties of operations and the relationship between addition and subtraction.
- Work with addition and subtraction equations.

Number and Operations in Base Ten

- Extend the counting sequence.
- Understand place value.
- Use place value understanding and properties of operations to add and subtract.

Measurement and Data

- Measure lengths indirectly and by iterating length-units.
- Tell and write time.
- Represent and interpret data.

Geometry

- Reason with shapes and their attributes.
