Kauffman, Daniel P. Hallahan, Paige Cullen Pullen, 2017-05-25 The purpose of the Handbook of Special Education is to help profile and bring greater clarity to the already sprawling and continuously expanding field of special education To ensure consistency across the volume chapter authors review and integrate existing research identify strengths and weaknesses note gaps in the literature and discuss implications for practice and future research The second edition has been fully updated throughout to take into account recent changes to federal laws as well as the most current academic research and an entirely new section has been added on research methods in special education International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Screening Angela E. Raffle, Anne Mackie, J. A. Muir Gray, 2019-06-06 Screening programmes involve the systematic offer of testing for populations or groups of apparently healthy people to identify individuals who may be at future risk of a particular medical condition or disease with the aim of offering intervention to reduce their risk For many years screening was practised without debate and without evidence but in the 1960s serious challenges were raised about many of the screening procedures then being practised Benefits and harms of screening must be measured in high quality trials and the benefits of screening must be weighed alongside the negative side effects Concerns were raised about potential and actual harm arising when people without a health problem received dangerous and unnecessary investigations and treatments as a result of routine screening tests Controversy raged and it took some 50 years to achieve widespread recognition that evidence based and quality assured programme delivery was essential coupled with provision of balanced informed to enable informed choice for potential participants Commercially motivated provision of poor quality and non evidence based

screening tests is increasing and screening remains a highly contested topic that has relevance in all health systems including for the general public and media This book serves as a practical and comprehensive guide to all aspects of screening Following the international success of the first edition this second edition brings extensive updates and new case study material The first section deals with concepts methods and evidence charts the story of screening back to 1861 and covers all aspects of a screening programme and how to research the full consequences The second section is a practical guide to sound policy making and to high quality delivery of best value screening The controversies paradoxes uncertainties and ethical dilemmas of screening are explained and each chapter is packed with examples real life case histories helpful summary points and self test questions Reference is made to the NHS a leader in screening but the primary focus is on universal principles making the book highly relevant across the globe Selected Water Resources Abstracts ,1987
