**Romans** Art Ross, Martha M. Stevenson, 1999-01-01 The letter to the Romans is the pinnacle of Paul's writing and thinking. Paul instructs his readers both then and now to be transformed from this world into living sacrifices, holy and acceptable to God, following the example of Jesus Christ. Interpretation Bible Studies (IBS) offers solid biblical content in a creative study format. Forged in the tradition of the celebrated Interpretation commentary series, IBS makes the same depth of biblical insight available in a dynamic, flexible, and user-friendly resource. Designed for adults and older youth, IBS can be used in small groups, in church school classes, in large group presentations, or in personal study. **Unconventional**

**Wisdom** June Boyce-Tillman, 2016-04-08 Early Christianity saw women in positions of authority and a fluid theology that included feminine figures in the notion of the Divine. However, for centuries, a male trinity has dominated theology with the characteristics of triumphalism, clarity, order, eternity, and unity. *Unconventional Wisdom* examines the attempt within the last half of the twentieth century to unearth the hidden theological tradition of feminine Wisdom. The book presents the work of influential theorists, notably Foucault, Belenky, and Dorothy Smith. The recovery of the feminine in the divine is linked with the rediscovery of subjugated value systems and what this might mean for ecclesiology. *Chemical Sensors* Ghenadii

Korotcenkov, 2012-07-15 Chemical sensors are integral to the automation of myriad industrial processes and everyday monitoring of such activities as public safety, engine performance, medical therapeutics, and many more. This 4-volume reference work covering simulation and modeling will serve as the perfect complement to Momentum Press's 6-volume reference works *Chemical Sensors: Fundamentals of Sensing*, *Materials and Chemical Sensors*, *Comprehensive Sensor Technologies*, which present detailed information related to materials technologies, construction, and application of various devices for chemical sensing. This 4-volume comprehensive reference work analyzes approaches used for computer simulation and modeling in various fields of chemical sensing and discusses various phenomena important for chemical sensing, such as bulk and surface diffusion, adsorption, surface reactions, sintering, conductivity, mass transport, interphase interactions, etc. In this work, it will be shown that theoretical modeling and simulation of the processes being a basis for chemical sensors operation could provide considerable progress in choosing both optimal materials and optimal configurations of sensing elements for using in chemical sensors. Each simulation and modeling volume in the present series reviews modeling principles and approaches peculiar to specific groups of materials and devices applied for chemical sensing. *Volume 2: Conductometric Type Sensors* covers phenomenological modeling and computational design of conductometric chemical sensors based on nanostructured materials such as metal oxides, carbon nanotubes, and graphene. This volume contains an overview of the approaches used to quantitatively evaluate characteristics of sensitive structures in which electric charge transport depends on the interaction between the surfaces of the structures and chemical compounds in the surrounding. *Sensors For Domestic Applications - Proceedings Of The 1st European School Of Sensors (Ess '94)* Arnaldo

D'amico, Giorgio Sberveglieri, 1995-05-31 This book contains 20 papers devoted to the domestic use of sensors This up to date review fills a gap in the literature arising from the recent intense research and development of these sensors and takes an interdisciplinary approach to the operation principles of sensors and the preparation techniques with particular regard to microelectronics techniques which allow the realization of sensor systems with integrated electronic circuitry The applications of sensors in the domestic environment are accurately reviewed and the trends of future sensor development are also outlined *Verslag Van Den Dienst Van Het Boschwezen In Nederlandshe-Indie* ,1905 *Advances in Electronic Ceramics, Volume 28, Issue 8* Clive Randall, Hua-Tay Lin, Kunihiro Koumoto, Paul Clem, 2007-11-09 Papers from The American Ceramic Society's 31st International Conference on Advanced Ceramics and Composites held in Daytona Beach Florida January 21-26 2007 Topics include advances in dielectric piezoelectric and ferroelectric materials electroceramic materials for sensors thermoelectric materials for power conversion applications and transparent conductive oxides **Index of Patents Issued from the United States Patent and Trademark Office** ,1983 **The Other Six Days** R. Paul Stevens, 2000-09-05 In this provocative book Stevens writes the clergy/laity division has no basis in the New Testament and challenges all Christians to rediscover what it means to live daily as God's people Exploring the theological structural and cultural reasons for treating laypeople as the objects of ministry Stevens argues against the idea of clericalism and in favor of equipping people for ministry in their homes workplaces and neighborhoods *Abide and Go* Michael J. Gorman, 2018-07-26 The Gospel of John would seem to be both the spiritual Gospel and a Gospel that promotes Christian mission Some interpreters however have found John to be the product of a sectarian community that promotes a very narrow view of Christian mission and advocates neither love of neighbor nor love of enemy In this book for both the academy and the church Michael Gorman argues that John has a profound spirituality that is robustly missional and that it can be summarized in the paradoxical phrase Abide and go from John 15 Disciples participate in the divine love and life and therefore in the life giving mission of God manifested in the ministry death and resurrection of Jesus As God's children disciples become more and more like this missional God as they become like his Son by the work of the Spirit This spirituality argues Gorman can be called missional theosis **Electron Technology** ,2000 *Encyklopädisches Wörterbuch oder alphabetische Erklärung aller Wörter aus fremden Sprachen, die im Deutschen angenommen sind* ,1800 **A Holistic Soteriology in an African Context** Veikko Munyika, 2004 *Hall Effect Devices* R.S. nanotechnology and this book addresses the demand for small reliable inexpensive and portable systems for monitoring environmental concerns indoor air quality food quality and many other specific applications Working principles including electrical permittivity field effect electrochemical optical thermometric and mass both quartz and cantilever types are discussed making the book valuable and accessible to a variety of researchers and engineers in the field of material science
