Market-Based Governance John D. Donahue, Joseph S. Nye, 2004-05-26 A Brookings Institution Press and Visions of Governance for the 21st Century publication The latest in a series exploring twenty first century governance this new volume examines the use of market means to pursue public goals Market based governance includes both the delegation of

traditionally governmental functions to private players and the importation into government of market style management approaches and mechanisms of accountability The contributors all from Harvard University assess market based governance from four perspectives The demand side deals with new revised or newly important forms of interaction between government and the market where the public sector is the customer Chapters in this section include Steve Kelman on federal procurement reform Karen Eggleston and Richard Zeckhauser on contracting for health care and Peter Frumkin The supply side section deals with unsettled questions about government's role as a provider rather than a purchaser within the market system Contributors include Georges de Menil Frederick Schauer and Virginia Wise A third section explores experiments with market based arrangements for orchestrating accountability outside government by altering the incentives that operate inside market institutions Chapters include Robert Stavins on market based environmental policy Archon Fung on social markets and Cary Coglianese and David Lazer The final section examines both the upside and the downside of the market based approach to improving governance Contributors include Elaine Kamarck John D Donahue Mark Moore and Robert Behn An introduction by John D Donahue frames market based governance as an effort to engineer into public work some of the intensive accountability that characterizes markets without surrendering the extensive accountability of conventional government A preface by Joseph S Nye Jr sets the book in the context of a larger inquiry into the future of governance

Who Owns Knowledge? Bernd Weiler, 2017-09-08 Who Owns Knowledge explores the emerging linkages between the extension of knowledge and the law It anticipates that the legal system will not only be called upon to adjudicate in matters of creative minds but will be expected to do so to an ever increasing degree Linkages between the legal system and knowledge are bound to multiply in modern societies Ironically while increasingly relying on knowledge we are simultaneously investing significant resources into controlling this same knowledge This includes developing a system of legal governance over how knowledge is extended or enlarged Such modes of governance may take the form of regulatory legal codes or legal challenges and judgments that shape the evolution of

modern society and potentially transform knowledge itself as a productive force Who Owns Knowledge asks such questions as What is the appropriate balance of public and private interests involved in this process How can creative powers natural resources and indigenous knowledge be protected from either public or private exploitation Does the law have the power to prevent this exploitation or is adaptive technology needed Also in this identity theft conscious age how can the rights of the individual be protected against policies allowing access to any kind of information especially confidential information The editors and contributors demonstrate that the relationship between knowledge and the law needs to be further researched and discussed Who Owns Knowledge is a must read for those interested in the subjects of intellectual property the history and development of modern legal and economic systems and their entanglements and how judicial systems make choices between the legal and economic systems and especially between the public and private good and their often opposing interests

The Emergence of Entrepreneurship Policy David M. Hart, 2003-10-27 This volume seeks to catalyze the emergence of a novel field of policy studies entrepreneurship policy Practical experience and academic research both point to the central role of entrepreneurs in the process of economic growth and to the importance of public policy in creating the conditions under which entrepreneurial companies can flourish The contributors who hail from the disciplines of economics geography history law management and political science seek to crystallize key findings and to stimulate debate about future opportunities for policy makers and researchers in this area The chapters include surveys of the economic social and cultural contexts for US entrepreneurship policy assessments of regional efforts to link knowledge producers to new enterprises explorations of policies that aim to foster entrepreneurship in under represented communities detailed analyses of three key industries biotechnology e commerce and telecommunications and considerations of challenges in policy implementation

Inclusive Governance in South Asia Nizam Ahmed, 2017-10-04 This edited volume explores the state of inclusive governance in South Asia It particularly examines the nature and scope of inclusiveness noticed in the parliament and civil service in Bangladesh India and Nepal and the judiciary in Bangladesh Where previous literature has stressed the need for the inclusion of external stakeholders this volume highlights the importance of the involvement of internal stakeholders This includes insiders such as opposition members and government backbenchers in parliament and specialists in the civil service The main emphasis is on identifying the extent to which insiders in different institutions have the scope to participate in the governing process Furthermore this volume also seeks to assess the implications of inclusiveness exclusiveness for democratic governance By exploring the link between inclusiveness and accountability its contributors are able to draw out the strengths and weaknesses of the existing mechanisms of accountability particularly social accountability This innovative collection will appeal to students and scholars of gender and development studies public policy and administration international relations law and political science

The Warping of Government Work John D. Donahue, 2008-05-30 It is a long standing pattern elite workers spurn public jobs while less skilled workers cling to government work as a refuge from a

harsh private economy Donahue documents government's isolation from the rest of the U S economy and arrays the stark choices we confront for narrowing or accommodating the divide between public and private work International Corporate Governance Thomas Clarke,2017-05-03 This new edition of Thomas Clarke's popular International Corporate Governance offers a comprehensive guide to understanding corporate governance as a discipline while incorporating new case studies and material that takes account of the implications of the global financial crisis and the continuing sustainability crisis

Unlocking the Power of Networks Stephen Goldsmith,Donald F. Kettl,2009-12-01 The era of strict top down stovepiped public management in America is over The traditional dichotomy between public ownership and privatization is an outdated notion Public executives have shifted their focus from managing workers and directly providing services to orchestrating networks of public private and nonprofit organizations to deliver those services Unlocking the Power of Networks employs original sector specific analyses to reveal how networked governance achieves previously unthinkable policy goals Stephen Goldsmith and Donald F Kettl head a stellar cast of policy practitioners and scholars exploring the potential strategies and best practices of high performance networks while identifying next generation issues in public sector network management They cover the gamut of public policy issues including national security and the book even includes a thought provoking look at how jihadist terrorists use the principles of network management to pursue their goals
