Images of Torah: From the Second-Temple Period to the Middle Ages Jeong Mun. Heo, 2023-06-26 This book explores the way that the Torah was appreciated and interpreted as a text and symbol in Christian and Jewish sources from the Second Temple period through the Middle Ages It tracks the development and complex interactions of three images of Torah God like Angelic and Messianic which are found in late antique Jewish and Christian materials as well as in medieval kabbalistic and Jewish philosophic sources It provides a unique template for tracing the development of theological ideas related to the images of Torah and offers a sophisticated and innovative analysis of the relationship between mystical experience theology and phenomenology

Time, Religion and History William Gallois, 2014-06-11 What is time How does our sense of time lead us to approach the world How did the peoples of the past view time This book answers these questions through an investigation of the cultures of time in Christianity Islam Buddhism Judaism and the Australian Dreamtime It argues that our contemporary world is blind as to the significance and complexity of time preferring to believe that time is natural and unchanging This is of critical importance to historians since the base matter of their study is time yet there is almost no theoretical literature on time in history This book offers the first detailed historiographical study of the centrality of time to human cultures It sets out the complex ways in which ideas of time developed in the major world religions and the manner in which such conceptions led people both to live in ways very different to our contemporary world and to make very different kinds of histories It goes on to argue that modern scientific descriptions of time such as Einsteins Theory of Relativity lie much closer to the complex understandings of time in religions such as Christianity than they do to our common sense notions of time which are centred on progress through a past present and future

Rethinking Jewish History and Memory Through Photography Ofer Ashkenazi, Thomas Pegelow Kaplan, 2025-08-01 Reveals the significance of photography in modern Jewish history and memory Rethinking Jewish History and Memory Through Photography highlights the significant role of photography in modern Jewish history and memory Considering photographs as unique documents that not only depict reality but also shape how it is perceived and remembered the volume emphasizes the importance of careful photographic analysis in understanding modern Jewish experiences self perceptions and memories Bringing together leading and emerging scholars the book offers a range of innovative approaches to central themes in modern Jewish history including nationalism migration race and antisemitism In addition to the discussion of various case studies a variety of methodological approaches for the current and future use of photoanalysis by scholars are presented

History and Religion
Bernd-Christian Otto, Susanne Rau, Jörg Rüpke, 2015-08-31 History is one of the most important cultural tools to make sense of one s situation to establish identity define otherness and explain change This is the first systematic scholarly study that analyses the complex relationship between history and religion taking into account religious groups both as producers of historical narratives as well as distinct topics of historiography Coming from different disciplines the authors of this volume

ask under which conditions and with what consequences religions are historicised How do religious groups employ historical narratives in the construction of their identities What are the biases and elisions of current analytical and descriptive frames in the History of Religion The volume aims at initiating a comparative historiography of religion and combines disciplinary competences of Religious Studies and the History of Religion Confessional Theologies History History of Science and Literary Studies By applying literary comparison and historical contextualization to those texts that have been used as central documents for histories of individual religions their historiographic themes tools and strategies are analysed The comparative approach addresses circum Mediterranean and European as well as Asian religious traditions from the first millennium BCE to the present and deals with topics such as the origins of religious historiography the practices of writing and the transformation of narratives

Jewish Culture between Canon and Heresy David Biale, 2023-02-07 This career spanning anthology from prominent Jewish historian David Biale brings over a dozen of his key essays together for the first time These pieces written between 1974 and 2016 are all representative of a method Biale calls counter history the discovery of vital forces precisely in what others considered marginal disreputable and irrational The themes that have preoccupied Biale throughout the course of his distinguished career in particular power sexuality blood and secular Jewish thought span the periods of the Bible late antiquity and the Middle Ages to the twentieth century Exemplary essays in this volume argue for the dialectical relationship between modernity and its precursors in the older tradition working together to brush history against the grain in order to provide a sweeping look at the history of the Jewish people This volume of work by one of the boldest and most intellectually omnivorous Jewish thinkers of our time will be essential reading for scholars and students of Jewish studies

Cataloging Policy and Support Office,2007 **Religion, Reason and Nature in Early Modern Europe** Robert Crocker,2001-10-31 From a variety of perspectives the essays presented here explore the profound interdependence of natural philosophy and rational religion in the long seventeenth century that begins with the burning of Bruno in 1600 and ends with the Enlightenment in the early Eighteenth century From the writings of Grotius on natural law and natural religion and the speculative libertin novels of Cyrano de Bergerac to the better known works of Descartes Malebranche Cudworth Leibniz Boyle Spinoza Newton and Locke an increasing emphasis was placed on the rational relationship between religious doctrine natural law and a personal divine providence While evidence for this intrinsic relationship was to be located in different places in the ideas already present in the mind in the observations and experiments of the natural philosophers and even in the history present experience and prophesied future of mankind the result enabled and shaped the broader intellectual and scientific discourses of the Enlightenment [New Dictionary of Theology: Historical and Systematic \(Second Edition\)](#) ,2016-04-21 Since its first publication in 1988 the New Dictionary of Theology has been widely appreciated by students and readers as a trustworthy and informative guide After almost thirty years however there are many new writers issues and themes on the agenda for theology does not stand still Hence this completely revised second edition includes over 400 new articles in the full set of over 800 Many of the original articles have been expanded and updated and almost all have additional bibliographical references Since material on biblical theology is now covered at length in IVP s New Dictionary of Biblical Theology this volume is therefore more specifically a dictionary of historical and systematic theology The New Dictionary of Theology Historical and Systematic has an international team of contributors and many are acknowledged experts in their fields The Dictionary combines excellence in scholarship with a high standard of clarity and insight into current theological issues yet it avoids being unduly technical Students teachers and ministers as well as scholars and everyone seeking a better understanding of theology will value it as an indispensable reference work The volume is enhanced by a spacious and clear design an extensive and easy to use cross reference system and bibliographies which feature the best and most readily available works in English [Christian Images and Their Jewish Desecrators](#) Katherine Aron-Beller,2024-01-09 In Christian Images and Their Jewish Desecrators historian Katherine Aron Beller analyzes the common Christian charge that Jews habitually and compulsively violated Christian images identifying this allegation as one that functioned alongside other anti Jewish allegations such as ritual murder blood libel and host desecration to ultimately inform dangerous and long lasting prejudices in medieval and early modern Europe Through an analysis of folk tales myths legal proceedings and religious art Aron Beller finds that narratives alleging that Jews

committed violence against images of Christ Mary and the disciples flourished in Europe between the fifth and seventeenth centuries She then explores how these narratives manifested differently across the continent and the centuries finding that their potency reflected not Jewish actions per se but Christians own concerns about slipping into idolatry when viewing depictions of religious figures In addition Aron Beller considers Jews own attitudes toward Christian imagery and the ways in which they responded to and rejected or embraced such allegations By examining how desecration allegations affected Jewish individuals and communities spanning Byzantium medieval England France Germany and early modern Spain and Italy Aron Beller demonstrates that this charge was a powerful expression of the Christian majority s anxiety around committing idolatry and their eagerness to participate in practices of veneration that revolved around visual images an anxiety that evolved through the centuries and persists to this day

Judaism and the World's Religions David Bamberger,1987 Basic facts about the major religions of the world are given with special emphasis on comparisons with Judaism

Images of Childhood C. Philip Hwang,Michael E. Lamb,Irving E. Sigel,2014-02-04 The twentieth century will surely be remembered as a period of remarkable calamity vigorous intellectual activity and striking technological progress For the first time in history the development of rapid forms of communication and transportation shrunk the effective size of the world so that many of its citizens were made aware of events occurring in far distant locations and came to appreciate cultural differences more directly than was previously possible Among the many trends and events for which the century may be remembered however one will surely be the ascendancy of science and scientific thinking Given adequate resources and ample time scientists have argued they will be able to reduce the mysteries of the universe as well as the mysteries of life and death to objectifiable processes and events The editors of this book draw attention to the implicit and explicit images of childhood that various disciplines especially development psychology have constructed These sometimes unspoken metaphors have enduring value in that they provide a means of drawing together integrating and interpreting otherwise disparate findings or conclusions They also provide a ready means of conveying the fruits of scientific research to the people who constitute its primary consumers The contributors strive to show that the images of childhood that each professional implicitly carries in her or his head vary across historical epochs just as they vary across cultures and subcultures Perhaps even more alarmingly some of these images seem to reflect the politically correct ideology of particular times and places at least as much as they represent the objective findings they purport to summarize This volume s main objective is to unpackage cultural and historical variations in the conception of childhood in order to make clearer those which might be considered universal aspects of behavioral and psychological development and those which must be seen as temporary cultural constructions or images The specific aims of this volume are to delineate images of childhood in diverse cultural subcultural and historical contexts illustrate how these images of childhood are manifested in popular proverbs as well as in distinct patterns of childrearing broadly conceived to include aspects of parental behavior childcare arrangements education

indoctrination and the assignment of responsibilities indicate how these images of childhood are manifest in the development and implementation of educational and social policies as well as in the legal status of children consider whether children are believed to have a privileged place in society and whether age graded constraints limit their roles and participation in society and evaluate the extent to which cultural images affect the ways in which developmental processes are viewed or understood
