Practice Fergus Allerton, Kelly L. Bowlt Blacklock, 2023-05-03 Infection prevention and control is vital within a veterinary setting but can find itself an automated part of care and therefore vulnerable to time constraints forgetfulness and routine This book is written by experts in the field and uses evidence based findings to elevate infection prevention to a well understood dynamic concept relevant to both veterinary practitioners and nurses in practice Beginning with an introduction to the importance of infection control dedicated chapters in this book then consider key principles such as hand hygiene personal protective equipment infection control for the surgical and hospitalised patient and care for immunosuppressed individuals Importantly this book presents an up to date exploration of responsible antibiotic use in the context of rising resistance **Infection Control in Clinical Practice Updated Edition** Jennie Wilson, 2019 Infection control is a major issue in clinical practice The revised third edition of this highly successful book provides a comprehensive guide to the principles and practice of infection control and prevention and the basic elements of microbiology and epidemiology that underpin them

Infection Control for Advanced Practice Professionals Denise M. Korniewicz, Ph.D, RN, FAAN, 2013-10-01 Presents best practices for infection prevention and control in advanced practice Emphasizes team approach for infection control Case study provided for each chapter This professional reference combines research on the best practices for infection control in clinical settings with essential information for advanced practice nurses and physician assistants The book is organized by healthcare settings and the coverage ranges from small practice offices to large hospitals and medical institutions Each chapter is prefaced by a case study which is then incorporated into the theoretical material of the chapter as a continuing illustration This format provides a reader friendly instructional resource for advanced practice certifications and staff development From the Foreword At last is published a long needed text for advanced practice nurses APNs providing them with the information essential to the care of essentially every patient they will encounter Infection Control for Advanced Practice Professionals fills a void in the literature and recognizes the importance of a team approach to the prevention of infections in the variety of care settings in which APNs are practicing The book is particularly timely and relevant because it appropriately places infection prevention solidly within the larger patient safety movement and affirms that preventing infections is everybody's concern In acute care settings for example infection control has occasionally been relegated to the infection prevention specialist e.g. infection control nurse or hospital epidemiologist or the infection control committee This has shown to be ineffective in any setting It is those who touch the patients and oversee their care who must assume the responsibility for preventing untoward events such as infections While not all infections are preventable there is indeed room for improvement This comprehensive reference is a first and essential step in that direction Elaine Larson PhD RN FAAN CIC
