Description:

A logical data object (LDO) is an object in a logical data object model that describes a logical entity in an enterprise. A logical data object mapping associated with the LDO helps you to integrate data from multiple sources and formats into a standardized view.

Consider a scenario where the enterprise data model requires that customer use a standard format and you want to provide a standardized view of customer data. So you need to reformat the customer data from multiple source to conform to the data model.

This is to be accomplished by creating a Logical Data Object in Informatica developer mapping and reformat the columns to the standard format using a logical data object mapping.

Mapping is shown below.

Dumas II, 2016-11-25 Not only does almost everyone in the civilized world use a personal computer smartphone and or tablet on a daily basis to communicate with others and access information but virtually every other modern appliance vehicle or other device has one or more computers embedded inside it One cannot purchase a current model automobile for example without several computers on board to do everything from monitoring exhaust emissions to operating the anti lock brakes to telling the transmission when to shift and so on Appliances such as clothes washers and dryers microwave ovens refrigerators etc are almost all digitally controlled Gaming consoles like Xbox PlayStation and Wii are powerful computer systems with enhanced capabilities for user interaction Computers are everywhere even when we don't see them as such and it is more important than ever for students who will soon enter the workforce to understand how they work This book is completely updated and revised for a one semester upper level undergraduate course in Computer Architecture and suitable for use in an undergraduate CS EE or CE curriculum at the junior or senior level Students should have had a course covering introductory topics in digital logic and computer organization While this is not a text for a programming course the

reader should be familiar with computer programming concepts in at least one language such as C C or Java Previous courses in operating systems assembly language and or systems programming would be helpful but are not essential
