The Tower of Hanoi - Myths and Maths Andreas M. Hinz, Sandi Klavžar, Uroš Milutinović, Ciril Petr, 2013-01-31 This is the first comprehensive monograph on the mathematical theory of the solitaire game The Tower of Hanoi which was invented in the 19th century by the French number theorist Édouard Lucas The book comprises a survey of the historical development from the game's predecessors up to recent research in mathematics and applications in computer science and psychology Apart from long standing myths it contains a thorough largely self contained presentation of the essential mathematical facts with complete proofs including also unpublished material The main objects of research today are the so called Hanoi graphs and the related Sierpinski graphs Acknowledging the great popularity of the topic in computer science algorithms and their correctness proofs form an essential part of the book In view of the most important practical applications of the Tower of Hanoi and its variants namely in physics network theory and cognitive neuro psychology other related structures and puzzles like e.g. the Tower of London are addressed Numerous captivating integer sequences arise along the way but also many open questions impose themselves Central among these is the famed Frame-Stewart conjecture Despite many attempts to decide it and large scale numerical experiments supporting its truth it remains unsettled after more than 70 years and thus demonstrates the timeliness of the topic Enriched with elaborate illustrations connections to other puzzles and challenges for the reader in the form of solved exercises as well as problems for further exploration this book is enjoyable reading for students educators game enthusiasts and researchers alike
