History In The Plural An Introduction To The Work Of Reinhart Koselleck:

History in the Plural Niklas Olsen, 2012 Reinhart Koselleck 1923 2006 was one of most imposing and influential European intellectual historians in the twentieth century Constantly probing and transgressing the boundaries of mainstream historical writing he created numerous highly innovative approaches absorbing influences from other academic disciplines as represented in the work of philosophers and political thinkers like Hans Georg Gadamer and Carl Schmitt and that of internationally renowned scholars such as Hayden White Michel Foucault and Quentin Skinner An advocate of grand theory Koselleck was an inspiration to many scholars and helped move the discipline into new directions such as conceptual history theories of historical times and memory and across disciplinary and national boundaries He thus achieved a degree of international fame that was unusual for a German historian after 1945 This book not only presents the life and work of a great thinker and European intellectual it also contributes to our understanding of complex theoretical and methodological issues in the cultural sciences and to our knowledge of the history of political historical and cultural thought in Germany from the 1950s to the present

Rethinking Modern European Intellectual History Darrin M. McMahon, Samuel Moyn, 2014-03 Modern European intellectual history is thriving as never before It has recovered from an era in which other trends like social and cultural history threatened to marginalize it But in spite of enjoying a contemporary renaissance the field has lost touch with the tradition of debating why and how to study ideas and thus lacks both a well articulated set of purposes and a range of arguments for exactly what it means to pursue those purposes This volume revives that tradition Recalling past attempts to showcase the diversity and differentiation of modern European intellectual history this volume also documents how much has changed in recent decades Some authors are much readier to defend a history of ideas practiced over the long term once the defining sin of the field Others go so far as to insist on how ideas are always open to reappropriation and reevaluation beyond their original contexts suggesting that it is an error to reduce the ideas to those contexts Others still argue that under threat from trends like social history intellectual historians have forsaken any attempt to resolve for themselves how ideas are socially embodied The volume also registers old and new trends in history that have affected the study of ideas including the history of science the history of academic disciplines the history of psychology and self international and global history and women's and gender history

The Crisis Paradigm Andrew Simon Gilbert, 2019-05-28 This book examines how 20th century theorists have used a discourse of crisis to frame their conceptualizations of modernity Through an investigation of four key thinkers Georg Lukács Hannah Arendt Reinhart Koselleck and Jürgen Habermas Gilbert argues that scholars in the social sciences and humanities should be cautious of treating crises as explananda for research Instead the book calls for sociological analysis of the role of crisis within social scientific discourse and examines how crisis has been used as a conceptual frame for legitimating theoretical agendas Gilbert's sociology of concepts approach presents crisis as a paradigm of modern thought and more generally reflects on how

concepts can become the carriers of diverse intellectual traditions and debates The Crisis Paradigm will be of interest to students and scholars of social and critical theory politics sociology and history as well as those working in the fields of media studies communication and discourse analysis *Experimental Histories* Hannah Weaver, 2024-08-15 In *Experimental Histories* Hannah Weaver examines the medieval practice of interpolation inserting material from one text into another which is often categorized as being a problematic inauthentic phenomenon akin to forgery and pseudoeigraphy Instead Weaver promotes interpolation as the signature form of medieval British historiography and a vehicle of historical theory arguing that some of the most novel concepts of time in medieval historiography can be found in these altered narratives of the past For Weaver historiographical interpolation constitutes the traces of active experimentation with how best to write history particularly the history of Britain Historians in twelfth and thirteenth century Britain recognized the difficulty of enfolding complex events into a linear chronology and embraced innovative textual methods of creating history Focusing on the Brut tradition but also analyzing the long history of interpolated historiography including the Bayeux Embroidery *Experimental Histories* offers a new interpretation of generic remixing in medieval writing about the past Drawing on both manuscript studies and the new formalism it shows that the practice of inserting materials from romance and hagiography allowed creative revisers to explore how lived events relate to passing time By embracing interpolation Weaver provides lively insights into the ways that time becomes history and human actors experience time *A History of the Cultural Travels of Energy* Peter Hjertholm, 2023-05-12 This book offers a cultural history of the travels of energy in the English language from its origins in Aristotle's ontology where it referred to the activity of being through its English usage as a way to speak about the inherent nature of things to its adoption as a name for the mechanics of motion capacity for work A distinguished literature deals with energy as matter of science history But this literature fails to adequately answer a historical question about the rise of the science of energy How did the commonplace word energy end up becoming a concept in science This account differs in important ways from the history of the word in the Oxford English Dictionary Discovering the origins and early travels of energy is essential for understanding how the word was borrowed into physics and therefore a cultural history of energy is a necessary companion to the science history of the term It is important that modern scholars in a variety of fields be aware that energy did not always have a scientific content The absence of that awareness can lead to have led to anachronistic interpretations of energy in historical sources from before the 1860s *A History of the Cultural Travels of Energy* will be useful for those interested in the history of science and technology cultural history and linguistics

Intellectual History and the Problem of Conceptual Change Elías J. Palti, 2024-05-09 How does long term intellectual change occur Can we develop a theoretical framework for understanding past systems of knowledge In this ambitious study Elías J. Palti seeks to reassess the main concepts in the field of intellectual history Evaluating modes of thought from the seventeenth century to the present this book aims to prevent an anachronistic understanding of the texts of

the past Palti rejects the idea of conceptual change as a coherent process deriving from one single source. Instead, he offers a convincing explanation of converging developments emanating from three different sources: namely the Cambridge school, the German school of conceptual history or *Begriffsgeschichte*, and French politico-conceptual history. Intellectual History and the Problem of Conceptual Change also closely examines the temporality of concepts, questioning how and why political languages mutate.

The Reception of Darwinian Evolution in Britain, 1859-1909 Martin Hewitt, 2024-10-20

The Reception of Darwinian Evolution in Britain 1859-1909 Darwinism's Generations uses the impact of Charles Darwin's *On the Origin of Species* 1859 in the 50 years after its publication to demonstrate the effectiveness of a generational framework for understanding the cultural and intellectual history of Britain in the nineteenth century. It challenges conventional notions of the Darwinian Revolution by examining how people from across all sections of society actually responded to Darwin's writings. Drawing on the opinions and interventions of over 2,000 Victorians drawn from an exceptionally wide range of archival and printed sources, it argues that the spread of Darwinian belief was slower, more complicated, more stratified by age, and ultimately shaped far more powerfully by divergent generational responses than has previously been recognised. In doing so, it makes a number of important contributions. It offers by far the richest and most comprehensive account to date of how contemporaries came to terms with the intellectual and emotional shocks of evolutionary theory. It makes a compelling case for taking proper account of age as a fundamental historical dynamic and for the powerful generational patternings of the effects that age produced. It demonstrates the extent to which the most common sub-periodisation of the Victorian period are best understood not merely as constituted by the exigencies of events but are also formed by the shifting balance of generational influence. Taken together, these insights present a significant challenge to the ways historians currently approach the task of describing the nature and experience of historical change and have fundamental implications for our current conceptions of the shape and pace of historical time.

The Thinking Historian Eric W. Sager, 2025-01-27

What is history? What are historians doing when we create our histories? The need for answers is more urgent than ever. We live in an era when history is often rejected or ignored and when all teachers of history confront formidable challenges. In the culture of screen capitalism and social media, historical knowledge is evaded in an expanding present-minded consciousness. How can history be defended and what is it that we are defending? This book argues that history is a mode of thinking, a form of imaginative reasoning with its own informal logic. In non-technical language and using examples from important works of history, the book defines core elements in historical thinking. These include contingency, complexity, temporality, parts and wholes, consilience, perspectives, analogy, and abduction. These elements are subsumed into the concept of imaginative reasoning. The overall argument echoes the work of hermeneutic philosophers: History is a disciplined imagination, tempered and empowered by its forms of reasoning. It embraces ethical imperatives that the historian has a duty to declare. Equipped with such understanding, historians may answer the many rejections of history and secure its place in our shared futures.

Crisis and

Critique Rodrigo Cordero,2016-07-15 Fragility is a condition that inhabits the foundations of social life It remains mostly unnoticed until something breaks and dislocates the sense of completion In such moments of rupture the social world reveals the stuff of which it is made and how it actually works it opens itself to question Based on this claim this book reconsiders the place of the notions of crisis and critique as fundamental means to grasp the fragile condition of the social and challenges the normalization and dissolution of these concepts in contemporary social theory It draws on fundamental insights from Hegel Marx and Adorno as to recover the importance of the critique of concepts for the critique of society and engages in a series of studies on the work of Habermas Koselleck Arendt and Foucault as to consider anew the relationship of crisis and critique as immanent to the political and economic forms of modernity Moving from crisis to critique and from critique to crisis the book shows that fragility is a price to be paid for accepting the relational constitution of the social world as a human domain without secure foundations but also for wishing to break free from all attempts at giving closure to social life as an identity without question This book will engage students of sociology political theory and social philosophy alike **Beyond**

Left-Wing Melancholia Enzo Traverso,2017-01-10 The fall of the Berlin Wall marked the end of the Cold War but also

the rise of a melancholic vision of history as a series of losses For the political left the cause lost was communism and this trauma determined how leftists wrote the next chapter in their political struggle and how they have thought about their past since Throughout the twentieth century argues Left Wing Melancholia from classical Marxism to psychoanalysis to the advent of critical theory a culture of defeat and its emotional overlay of melancholy have characterized the leftist understanding of the political in history and in theoretical critique Drawing on a vast and diverse archive in theory testimony and image and on such thinkers as Karl Marx Walter Benjamin Theodor W Adorno and others the intellectual historian Enzo Traverso explores the varying nature of left melancholy as it has manifested in a feeling of guilt for not sufficiently challenging authority in a fear of surrendering in disarray and resignation in mourning the human costs of the past and in a sense of failure for not realizing utopian aspirations Yet hidden within this melancholic tradition are the resources for a renewed challenge to prevailing regimes of historicity a passion that has the power to reignite the dialectic of revolutionary thought
