Library, 1876 **The Oxford Handbook of Early Modern European History, 1350-1750** Hamish Scott, 2015-07-23 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey

early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam An Economic History of the First German Unification Ulrich Pfister,Nikolaus Wolf,2023-03-27 There is a striking chronological parallel between Germany s transition from a post Malthusian regime to modern economic growth and the formation of a modern nation state between the late 1860s and the early 1880s which culminated in the events of 1871 The central question of this book is whether and how such state formation did in fact contribute to economic development Twenty chapters written by leading experts in their respective fields deal with various aspects of the book s main question Together they identify three channels by which national unification contributed to Germany s economic development 1 Creation of a nation state completed a process of institutional Unification of a large inland area and thereby increased the integration of domestic markets 2 Unification raised the capacity of the political system with respect to regulating complex domains such as stock companies patenting and social insurance 3 The emerging political regime of market preserving federalism promoted the quality of economic institutions Moreover a set of chapters dealing with the experience of other European economies apart from Germany during the second half of the nineteenth century highlight additional factors in nineteenth century economic development most notably the first wave of modern globalization and economic geography Readers interested in the history of state building and the economic history of Germany and of Europe in general during the age of industrialization and globalization and students of the economic effects of political integration and decentralized state growth will all gain much from this book **The Athenaeum** ,1913 **The Cambridge History of the First World War: Volume 2, The State** Jay Winter,2014-01-09 Volume 2 of The Cambridge History of the First World War offers a history of the war from a predominantly political angle and concerns itself with the story of the state It explores the multifaceted history of state power and highlights the ways in which different political systems responded to and were deformed by the near unbearable pressures of war Every state involved faced issues of military civilian relations parliamentary reviews of military policy and the growth of war economies and yet their particular form and significance varied in every national case Written by a global team of historical experts this volume sets new standards in the political history of the waging of war in an authoritative new narrative which addresses problems of logistics morale innovation in tactics and weapons systems the use and abuse of science all of which were ubiquitous during the conflict The Foreign Quarterly Review ,1836 **Catalogue of the London library. [With] [With] Appendix** Robert Harrison,London Lond. libr,1888 *The Historians' History of the World Vol.1 (of 25) (Illustrations)* Henry Smith Williams, A complete world history should properly speaking begin with the creation of the world as man s habitat and should trace every step of human progress from the time when man first appeared on the globe Unfortunately the knowledge of to day

does not permit us to follow this theoretical obligation We now know that the gaps in the history of human evolution as accessible to us to day vastly exceed the recorded chapters that in short the period with which history proper has at present to content itself is a mere moment in comparison with the vast reaches of time which in recognition of our ignorance we term prehistoric But this recognition of limitations of our knowledge is a quite recent growth no older indeed than a half century Prior to 1859 the people of Christendom rested secure in the supposition that the chronology of man s history was fully known from the very year of his creation One has but to turn to the first chapter of Genesis to find in the margin the date 4004 B C recorded with all confidence as the year of man s first appearance on the globe One finds there too a brief but comprehensive account of the manner of his appearance as well as of the creation of the earth itself his abiding place Until about half a century ago as has just been said the peoples of our portion of the globe rested secure in the supposition that this record and this date were a part of our definite knowledge of man s history Therefore one finds the writers of general histories of the earlier days of the nineteenth century beginning their accounts with the creation of man B C 4004 and coming on down to date with a full and seemingly secure chronology Our knowledge of the world and of man s history has come on by leaps and bounds since then with the curious result that to day no one thinks of making any reference to the exact date of the beginnings of human history unless indeed it be to remark that it probably reaches back some hundreds of thousands of years The historian can speak of dates anterior to 4004 B C to be sure The Egyptologist is disposed to date the building of the Pyramids a full thousand years earlier than that And the Assyriologist is learning to speak of the state of civilisation in Chaldea some 6000 or 7000 years B C with a certain measure of confidence But he no longer thinks of these dates as standing anywhere near the beginning of history He knows that man in that age in the centres of progress had attained a high stage of civilisation and he feels sure that there were some thousands of centuries of earlier time during which man was slowly climbing through savagery and barbarism of which we have only the most fragmentary record He does not pretend to know anything except by inference of the dawns of civilisation Whichever way he turns in the centres of progress such as China Egypt Chaldea India he finds the earliest accessible records covering at best a period of only eight or ten thousand years giving evidence of a civilisation already far advanced Of the exact origin of any one of the civilisations with which he deals he knows absolutely nothing The Creation of Man with its fixed chronology is a chapter that has vanished from our modern histories To be continue in this ebook
