Hitachi Ac Remote Guide:

A Practical Guide to Price Index and Hedonic Techniques Ana M. Aizcorbe, 2014-06-12 This book provides an accessible guide to price index and hedonic techniques with a focus on how to best apply these techniques and interpret the resulting measures One goal of this book is to provide first hand experience at constructing these measures with guidance on practical issues such as what the ideal data would look like and how best to construct these measures when the data are less than ideal A related objective is to fill the wide gulf between the necessarily simplistic elementary treatments in textbooks and the very complex discussions found in the theoretical and empirical measurement literature Here the theoretical results are summarized in an intuitive way and their numerical importance is illustrated using data and results from existing studies Finally while the aim of much of the existing literature is to better understand official price indexes like the Consumer Price Index the emphasis here is more practical to provide the needed tools for individuals to apply these techniques on their own As new datasets become increasingly accessible tools like these will be needed to obtain summary price measures Indeed these techniques have been applied for years in antitrust cases that involve pricing where economic experts typically have access to large granular datasets Buyer's Guide to Component TV Carl H. Grid and Cooperative Computing - GCC 2004 Workshops Hai Jin, Yi Pan, Nong Xiao, Jianhua Sun, 2011-04-08 Welcome to the proceedings of GCC2004 and the city of Wuhan. Grid computing has become a mainstream research area in computer science and the GCC conference has become one of the premier forums for presentation of new and exciting research in all aspects of grid and cooperative computing. The program committee is pleased to present the proceedings of the 3rd International Conference on Grid and Cooperative Computing GCC2004 which comprises a collection of excellent technical papers, posters, workshops, and keynote speeches. The papers accepted cover a wide range of exciting topics including resource grid and service grid, information grid and knowledge grid, grid monitoring, management and organization tools, grid portal, grid service Web services and their QoS, service orchestration, grid middleware and toolkits, software glue technologies, grid security, innovative grid applications, advanced resource reservation and scheduling, performance evaluation and modeling, computer supported cooperative work, P2P computing, automatic computing and meta information management. The conference continues to grow and this year a record total of 581 manuscripts including workshop submissions were submitted for consideration. Expecting this growth, the size of the program committee was increased from 50 members for GCC 2003 to 70 in GCC 2004. Relevant differences from previous editions of the conference it is worth mentioning a significant increase in the number of papers submitted by authors from outside China and the acceptance rate was much lower than for previous GCC conferences. From the 427 papers submitted to the main conference, the program committee selected only 96 regular papers for oral presentation and 62 short papers for poster presentation in the program.
