

A stylized illustration in shades of orange and red. It depicts a mother's face in profile, gently kissing her baby's head. The baby's face is also in profile, looking towards the left. The lines are thick and expressive, giving it a sketch-like quality. The background is a warm, textured orange.

What to Eat Marion Nestle, 2025-10-16 What to Eat is a classic the perfect guidebook to help navigate through the confusion of which foods are good for us USA Today Since its publication in 2006

Marion Nestle's *What to Eat* has become the definitive guide to making healthy and informed choices about food. Praised as radiant with maxims to live by in *The New York Times Book Review* and accessible, reliable, and comprehensive in *The Washington Post*, *What to Eat* is an indispensable resource packed with important information and useful advice from the acclaimed nutritionist who has become to the food industry what Ralph Nader was to the automobile industry. *St. Louis Post Dispatch*: How we choose which foods to eat is growing more complicated by the day, and the straightforward, practical approach of *What to Eat* has been praised as welcome relief. As Nestle takes us through each supermarket section—produce, dairy, meat, fish—she explains the issues, cutting through foodie jargon and complicated nutrition labels and debunking the misleading health claims made by big food companies. With Nestle as our guide, we are shown how to make wise food choices and are inspired to eat sensibly and nutritiously. *Nutrition* Barbara A. Brehm, 2015-06-10. This thorough one-stop resource draws on solid science and the latest research to play a dual educational role: providing background for students while answering general readers' questions about a wide range of nutrition-related topics. Nutrition is a popular but often misunderstood topic, one about which there is a great deal of interest, as evidenced by the plethora of available advice. Because nutrition is a key factor in health, it is important that the public have a source of information they can trust. This is that source: a comprehensive overview that will help readers make sense of conflicting information they find in the media regarding what is healthy and what is not. Organized alphabetically, the two-volume work covers the most important topics in human nutrition, including nutrients, nutrition-related health concerns, aging and nutrition, eating disorders, and the value of dietary supplements. The digestive system and its organs are discussed with particular attention to health issues such as irritable bowel syndrome and the role of helpful bacteria. The physiology of hunger and the psychology of appetite and eating behaviors are explained. The work also delves into data on foods that have been featured in recent research, such as garlic, ginger, and turmeric, and it offers consumers a clearer understanding of nutrition-related practices such as organic farming, genetically modified foods, and the use of food additives. *The Progressive Parent* Kavin Senapathy, 2024-08-06. An evidence-based, social justice-minded exploration of modern parenting from an award-winning science journalist and cofounder of SciMoms. How can we raise happy, well-adjusted kids today amid so much injustice and uncertainty? This is the question at the heart of the progressive parent's dilemma. Fortunately, award-winning science journalist Kavin Senapathy has the answers. In this lively, accessible exploration of modern parenting, Senapathy guides readers through the complex cultural, environmental, economic, and political issues facing all families today. Equipped with practical tips and research-driven advice for parents of kids from infancy to early teens, she helps readers build a more fulfilling relationship with their children and themselves by addressing pressing questions such as: Is formula feeding okay? What is natural parenting? How much screen time is too much screen time? How do I help my children navigate questions around race and gender identity? Informed by her experiences as a nonbinary parent of color and filled with a science journalist's hard-won wisdom, *The Progressive Parent* is an essential read.

for any parent or parent to be who believes that the values of science truth equity and justice should be applied not only individually but collectively

The One Best Way? Tasnim Nathoo,Aleck Ostry,2011-04-07 In recent years breastfeeding has been prominently in the public eye in relation to debates on issues ranging from parental leave policies work family balance public decency the safety of our food supply and public health concerns such as health care costs and the obesity epidemic Breastfeeding has officially been considered the one best way for feeding infants for the past 150 years of Canadian history This book examines the history and evolution of breastfeeding policies and practices in Canada from the end of the nineteenth century to the turn of the twenty first The authors historical approach allows current debates to be situated within a broader social political cultural and economic context Breastfeeding shifted from a private matter to a public concern at the end of the nineteenth century Over the course of the next century the best way to feed infants was often scientifically or politically determined and guidelines for mothers shifted from one generation to the next Drawing upon government reports academic journals archival sources and interviews with policy makers and breastfeeding advocates the authors trace trends patterns ideologies and policies of breastfeeding in Canada

The Big Letdown Kimberly Seals Allers,2017-01-24 Pediatricians say you should but it s okay if you don t The hospital says Breast is best but sends you home with formula just in case Your sister in law says Of course you should Your mother says I didn t and you turned out just fine Celebrities are photographed nursing in public yet breastfeeding mothers are asked to cover up in malls and on airplanes Breastfeeding is a private act yet everyone has an opinion about it How did feeding our babies get so complicated Journalist and infant health advocate Kimberly Seals Allers breaks breastfeeding out of the realm of personal choice and shows our broader connection to an industrialized food system that begins at birth the fallout of feminist ideals and the federal policies that are far from family friendly The Big Letdown uncovers the multibillion dollar forces battling to replace mothers milk and the failure of the medical establishment to protect infant health Weaving together research and personal stories with original reporting on medicine big pharma and hospitals Kimberly Seals Allers shows how mothers and babies have been abandoned by all the forces that should be supporting families from the start and what we can do to help
