Eco-efficiency and Beyond Jan-Dirk Seiler-Hausmann, Christa Liedtke, Ernst Ulrich von Weizsäcker, 2017-09-29 Business as usual it is widely accepted will exceed the Earth's carrying capacity in an alarmingly short space of time In simple terms we need to learn to use the world's rapidly depleting resources in a significantly more efficient manner Practical and readily adopted solutions are needed now Eco efficiency or produce more with less is achieved when goods and services satisfy human needs increase the quality of life at competitive prices and when environmental impacts and resource intensity are decreased to a degree that keeps them within the limits of Earth's expected carrying capacity Eco efficiency a term first proposed by the World Business Council for Sustainable Development in 1992 is a management approach that allows businesses to carry out environmental protection measures from a market oriented point of view with the aim of illustrating that ecology and the economy do not need to be a contradiction Indeed eco efficiency has been portrayed as a win win for both business and the environment This book which developed out of two conferences on eco efficiency held in Düsseldorf in 1998 and 2001 is edited by Ernst Ulrich von Weizsäcker and his team from the Wuppertal Institute for Climate Environment and Energy one of the world's leading research programmes on resource productivity The aim is not simply to explain the past and present of eco efficiency but to look forward to and encourage a future where the
