National Center for Environmental Health. Division of Environmental Hazards and Health Effects. Radiation Studies Branch, 2008* **Medical Response to Terror Threats**

Aaron Richman, Shmuel C. Shapira, Yair Sharan, 2010 We do not automatically associate the practice of medicine with al Qaeda or weapons of mass destruction yet medical practitioners increasingly play their part in the war against terrorism Called to risk their own lives in order to help others they are always among those first responders who must overcome their natural instinct to get away and instead rush to the scene of any fresh terror attack to offer what aid they can to the victims The successful medical response to terror threats requires regular training and accurate information This book is one product of the NATO workshop Terror Medicine held in Jerusalem in 2008 The twelve chapters were written by the subject matter experts who led this workshop and topics covered include assessment of medical threats in various types of terrorist attack the special medical threat of suicide bombings the unique epidemiology of terrorist attacks management of terror related mass casualty events MCE analysis of case studies and best practices as well as lessons learned and standard operating protocol SOP expertise Reflecting multiple lifetimes worth of experience and research and providing expert analysis to the professionals who must respond to the hazards threats and injuries caused by terrorism this book is an important addition to the resources of those who continue to fight global terrorism with their medical skills as well as being of interest to all who support them in that fight **Koenig and Schultz's Disaster Medicine** Kristi L. and for how to respond if necessary Whether you are an emergency responder a medical caregiver a public health official even a member of the public wanting to know how to keep yourself and your loved ones safe there is a need to understand how these weapons work how radiation affects our health how to stop an attack from taking place how to respond appropriately in the event of an emergency and much more Unfortunately the knowledge that is needed to accomplish all of this is lacking at all levels of society and government In this book Dr Andrew Karam an internationally respected expert in radiation safety and multiple aspects of radiological and nuclear emergencies discusses how these weapons work and what they can do how they can affect our health how to keep yourself safe and how to react appropriately whether you are a police officer investigating a suspect radiological weapon a firefighter responding to a radiological or nuclear attack a nurse or physician caring for potentially contaminated patients or a governmental official trying to keep the public safe To do this he draws upon his extensive experience in the military the several years he worked directly with emergency responders his service on a number of advisory committees and multiple trips overseas in the aftermath of the Fukushima accident and on behalf of the International Atomic Energy Agency Interpol and the Health Physics Society
