   Gurung-Nepali-English Dictionary, with English-Gurung and Nepali-Gurung Indexes Warren W. Glover,Jessie Glover,Deu Bahadur Gurung,1977   *Lesser-Known Languages of South Asia* Anju Saxena,Lars Borin,2008-08-22 The increasing globalization and centralization in the world is threatening the existence of a large number of smaller languages In South Asia some locally dominant languages e g Hindi Urdu Nepali are gaining ground beside English at the expense of the lesser known languages Despite a long history of stable multilingualism language death is not uncommon in the South Asian context We do not know how the language situation in South Asia will be affected by modern information and communication technologies Will cultural and linguistic diversity be strengthened or weakened as they become increasingly prevalent in all walks of life This volume brings together areas of research that so far do not interact to any significant extent traditional South Asian descriptive linguistics and sociolinguistics documentary linguistics issues of intellectual and cultural property and fieldwork ethics and language technology Researchers working in the areas of documentary linguistics and language technology have become aware of each other in the last few years and of how work in the other area could be potentially useful in furthering their own aims Similarly the insights of documentary linguistics are making their way into descriptive linguistics and sociolinguistics However the potential for synergy among these areas of research is almost limitless This volume provides the reader not so much with a do it yourself recipe for applying modern technology to the problem of language shift in South Asia today but rather with some basic knowledge about the problems involved and some directions from which solutions could be forthcoming a toolbox rather than a blueprint for helping to shape the linguistic future of South Asia   *The Languages and Linguistics of South Asia* Hans Henrich Hock,Elena Bashir,2016-05-24 With nearly a quarter of the world s population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed   **Historical Dictionary of Nepal** Nanda R.
