W. Van Bemmelen, 2013-10-22 *Developments in Geotectonics Volume 2 Geodynamic Models An Evaluation and a Synthesis* presents the concept of sea floor spreading and the hypothesis of global plate tectonics. This book provides a basic understanding of the global movements. Organized into eight chapters, this volume begins with an overview of the concept of global plate tectonics with its additional hypotheses of subduction zones and sea floor spreading. This text then examines the concept of vertical deformations of the lithosphere and their gravitational spreading. Other chapters consider the analysis of geotectonic processes that is based on some general principles of their mechanics. This book discusses as well the origin of mega undulations in turbulent and laminar flow systems in the lower mantle where the matter may have a Newtonian viscosity. The final chapter deals with the geodynamics of the Earth's crust as the result of the outward growth of the deep ocean floor from mid ocean ridges. This book is a valuable resource for geologists, geonomists and geophysicists. Climate Actions

Brenda Groskinsky, 2022-03-15 This book offers a diverse set of solid concerted strategies in the development and implementation of specific climate actions in natural and built places where we all live. The book also serves as a conduit of knowledge for those who are unsure on how they can make a difference for their families, their communities and the natural places that surround them. Through many actionable examples of mitigation efforts for the ever present effects of climate change, especially for those who may not understand the wide range of climate action opportunities that are available. Scientists, academics and community leaders will find concrete examples on how they too can develop and implement climate action solutions. Building an Ark

Ethan Smith, Guy Dauncey, 2007-11-01 *Building an Ark 101 Solutions to Animal Suffering* is a first of its kind inspiring look at practical solutions for the humane treatment of animals and animal liberation. Animal cruelty has many forms: factory farms, habitat destruction, animal product testing, the abuse and neglect of companion animals, the illegal trade in endangered species, unsustainable fishing and climate change. All these create unnecessary suffering for animals and destroy animal rights. For several decades there has been a global movement building an ever increasing consciousness that will soon affect animal welfare and the future of life on Earth if it's given time to do so. *Building an Ark* is the story of this movement. Extensively researched and drawing on practical examples from around the world, it provides a voice for both the animals and the humans who have dedicated their lives to building a sustainable future for all species. The ark is ready for all to board. Individuals, action groups, schools, businesses, governments, farmers, fishers, developing nations, there's a role for everyone on this journey. *Building an Ark* offers a host of solutions that if adopted will ensure that animals will suffer less today and that humans and animals will share a more sustainable planet tomorrow. Ethan Smith is a writer, animal welfare advocate and author, editor of the anthology *Softly On This Earth: Joining Those Who Are Healing Our Planet*. Guy Dauncey founded the Solutions Project and is author of several books including *Stormy Weather: 101 Solutions to Global Climate Change*.
