**The Practice of Network Security Monitoring** Richard Bejtlich, 2013-07-15 Network security is not simply about building impenetrable walls determined attackers will eventually overcome traditional defenses The most effective computer security strategies integrate network security monitoring NSM the collection and analysis of data to help you detect and respond to intrusions In The Practice of Network Security Monitoring Mandiant CSO Richard Bejtlich shows you how to use NSM to add a robust layer of protection around your networks no prior experience required To help you avoid costly and inflexible solutions he teaches you how to deploy build and run an NSM operation using open source software and vendor neutral tools You ll learn how to Determine where to deploy NSM platforms and size them for the monitored networks Deploy stand alone or distributed NSM installations Use command line and graphical packet analysis tools and NSM consoles Interpret network evidence from server side and client side intrusions Integrate threat intelligence into NSM software to identify sophisticated adversaries There s no foolproof way to keep attackers out of your network But when they get in you ll be prepared The Practice of

Network Security Monitoring will show you how to build a security net to detect contain and control them Attacks are inevitable but losing sensitive data shouldn't be

**Active Networks** Ian W. Marshall, Scott Nettles, Naoki Wakamiya, 2003-06-30 This volume of the LNCS series contains the papers accepted for presentation at the Third IFIP international working conference on active networks IWAN 2001 The workshop was held at the Sheraton University City Hotel in Philadelphia USA and was hosted by the University of Pennsylvania Active networks aim to ease the introduction of network services by adding dynamic programmability to network devices such as routers and making aspects of the programmability accessible to users Active networks research has focused on the development and testing of active techniques that enable dynamic programmability in a networked environment These techniques have a wide variety of applications At IWAN 2001 we aimed to bring together members of the various communities using active and related techniques and provide a forum for discussion and collaboration involving researchers developers and potential users Papers presented at IWAN 2001 covered the application of active techniques to many aspects of network based communication including active multicast active QoS active security active GRIDs and active management In addition there were papers on architectures language and API issues Although there were only 22 submissions the standard of the 10 accepted papers was very high This indicated clearly a substantial amount of ongoing high quality research in active networking despite the current unfavorable economic conditions in the telecommunications industry The papers also demonstrated that the research is genuinely global and justifies an international workshop of this type We would like to thank all the authors who submitted their work

**The Tao of Network Security Monitoring** Richard Bejtlich, 2004-07-12 The book you are about to read will arm you with the knowledge you need to defend your network from attackers both the obvious and the not so obvious If you are new to network security don't put this book back on the shelf This is a great book for beginners and I wish I had access to it many years ago If you've learned the basics of TCP/IP protocols and run an open source or commercial IDS you may be asking What's next If so this book is for you Ron Gula founder and CTO Tenable Network Security from the Foreword Richard Bejtlich has a good perspective on Internet security one that is orderly and practical at the same time He keeps readers grounded and addresses the fundamentals in an accessible way Marcus Ranum TruSecure This book is not about security or network monitoring It's about both and in reality these are two aspects of the same problem You can easily find people who are security experts or network monitors but this book explains how to master both topics Luca Deri ntop.org This book will enable security professionals of all skill sets to improve their understanding of what it takes to set up maintain and utilize a successful network intrusion detection strategy Kirby Kuehl Cisco Systems Every network can be compromised There are too many systems offering too many services running too many flawed applications No amount of careful coding patch management or access control can keep out every attacker If prevention eventually fails how do you prepare for the intrusions that will eventually happen Network security monitoring NSM equips security staff to deal with the inevitable

consequences of too few resources and too many responsibilities NSM collects the data needed to generate better assessment detection and response processes resulting in decreased impact from unauthorized activities In The Tao of Network Security Monitoring Richard Bejtlich explores the products people and processes that implement the NSM model By focusing on case studies and the application of open source tools he helps you gain hands on knowledge of how to better defend networks and how to mitigate damage from security incidents Inside you will find in depth information on the following areas The NSM operational framework and deployment considerations How to use a variety of open source tools including Sguil Argus and Ethereal to mine network traffic for full content session statistical and alert data Best practices for conducting emergency NSM in an incident response scenario evaluating monitoring vendors and deploying an NSM architecture Developing and applying knowledge of weapons tactics telecommunications system administration scripting and programming for NSM The best tools for generating arbitrary packets exploiting flaws manipulating traffic and conducting reconnaissance Whether you are new to network intrusion detection and incident response or a computer security veteran this book will enable you to quickly develop and apply the skills needed to detect prevent and respond to new and emerging threats
