Modular Programming Languages Jürg Gutknecht, Wolfgang Weck, 2006-12-31

The circle is closed The European Modula 2 Conference was originally launched with the goal of increasing the popularity of Modula 2 a programming language created by Niklaus Wirth and his team at ETH Zurich as a successor of Pascal For more than a decade the conference has wandered through Europe passing Bled Slovenia in 1987 Loughborough UK in 1990 Ulm Germany in 1994 and Linz Austria in 1997 Now at the beginning of the new millennium it is back at its roots in Zurich Switzerland While traveling through space and time the conference has mutated It has widened its scope and changed its name to Joint Modular Languages Conference JMLC With an invariant focus though on modular software construction in teaching research and out there in industry This topic has never been more important than today ironically not because of insufficient language support but quite on the contrary due to a truly confusing variety of modular concepts offered by modern languages modules packages classes and components the newest and still controversial trend The recent notion of component is still very vaguely defined so vaguely in fact that it almost seems advisable to ignore it Wirth in his article Records Modules Objects Classes Components in honor of Hoare's retirement in 1999 Clarification is needed
