Information Foraging Theory: Adaptive Interaction with Information Peter Pirolli, 2007-04-12 Although much of the hubris and hyperbole surrounding the 1990 s Internet has softened to a reasonable level the inexorable momentum of information growth continues unabated This wealth of information provides resources for adapting to the problems posed by our increasingly complex world but the simple availability of more information does not guarantee its successful transformation into valuable knowledge that shapes guides and improves our activity When faced with something like the analysis of sense making behavior on the web traditional research models tell us a lot about learning and performance with browser operations but very little about how people will actively navigate and search through information structures what information they will choose to consume and what conceptual models they will induce about the landscape of cyberspace Thus it is fortunate that a new field of research Adaptive Information Interaction AII is becoming possible AII centers on the problems of understanding and improving human information interaction It is about how people will best shape themselves to their information environments and how information environments can best be shaped to people Its roots lie in human computer interaction HCI information retrieval and the behavioral and social sciences This book is about Information Foraging Theory IFT a new theory in Adaptive Information Interaction that is one example of a recent flourish of theories in adaptationist psychology that draw upon evolutionary ecological theory in biology IFT assumes that people indeed all organisms are ecologically rational and that human information seeking mechanisms and strategies adapt the structure of the information environments in which they operate Its main aim is to create technology that is better shaped to users Information Foraging Theory will be of interest to student and professional researchers in HCI and cognitive psychology

Information Foraging Theory Peter L. T. Pirolli, 2009-05-16 Although much of the hubris and hyperbole surrounding the 1990 s Internet has softened to a reasonable level the inexorable momentum of information growth continues unabated This wealth of information provides resources for adapting to the problems posed by our increasingly complex world but the simple availability of more information does not guarantee its successful transformation into valuable knowledge that shapes guides and improves our activity When faced with something like the analysis of sense making behavior on the web traditional research models tell us a lot about learning and performance with browser operations but very little about how people will actively navigate and search through information structures what information they will choose to consume and what conceptual models they will induce about the landscape of cyberspace Thus it is fortunate that a new field of research Adaptive Information Interaction AII is becoming possible AII centers on the problems of understanding and improving human information interaction It is about how people will best shape themselves to their information environments and how information environments can best be shaped to people Its roots lie in human computer interaction HCI information retrieval and the behavioral and social sciences This book is about Information Foraging Theory IFT a new theory in Adaptive

Information Interaction that is one example of a recent flourish of theories in adaptationist psychology that draw upon evolutionary ecological theory in biology IFT assumes that people indeed all organisms are ecologically rational and that human information seeking mechanisms and strategies adapt the structure of the information environments in which they operate Its main aim is to create technology that is better shaped to users Information Foraging Theory will be of interest to student and professional researchers in HCI and cognitive psychology

Jean,Ursula Gorham,Elizabeth Bonsignore,2021-03-25 This introductory textbook aims to provide undergraduate students in information science and related disciplines with an applied grounding in information behavior The book s primary focus is to provide explicit links between information behavior and the careers that students will pursue within the information professions With a deeper understanding of information behavior students will be better equipped to address the many types of barriers that frequently prevent people from effectively and efficiently accessing understanding managing and or using the information they need in the real world The first six chapters of the book provide students with the fundamental building blocks of information behavior introduce them to important related concepts and provide a deep dive into information literacy digital literacy the digital divide and digital inclusion Chapters 7 through 12 introduce students to the scholarly communication system providing guidance on how to find read and critically evaluate information behavior studies Also explored in these chapters are the various methods used to investigate and understand people s information behaviors Topics covered include research design research methods research ethics user needs assessment and human computer interaction and associated design methods This part of the book also covers some of the major information behavior models and theories that have been developed to describe predict and or explain people s information behaviors In chapters 13 through 16 the authors provide an in depth look into their own information behavior research areas including consumer health information behavior and health justice youth information behavior legal information behavior and access to justice and information

behavior in libraries In the final chapter students are first introduced to a wide range of careers within the information professions and then taken along on a deep dive into 10 specific jobs with a special focus on the thread of information behavior that pervades the roles and responsibilities commonly associated with these positions Each chapter begins with one or more scenarios illustrating concepts covered in the chapter and ends with discussion questions

Flash Teams Melissa Valentine, Michael Bernstein, 2025-10-07 A dramatic new future of work in which managers assemble exactly the expertise they need within minutes Gone are the days of static organizational charts and staffing based on the manager's rolodex and intuition Now you can recruit any expertise you need from a global online network within minutes and on demand on the spot expert at the exact moment that you need their help You can right size their involvement too some of those experts give a second opinion or a moment of brainstorming whereas others join as full fledged team members for a sustained collaborative effort This is the future promised by flash teams a model that The New York Times has already praised for its revolutionary potential a world where experts are available anytime and everywhere where remote work has become a norm and where AI is in the loop to guide team decisions In *Flash Teams* award winning management scholar Melissa Valentine and computer scientist Michael Bernstein chart the opportunities of flash teams and navigate the challenges that teams and managers will face They distill lessons from their own work assembling and managing flash teams on demand that every manager can learn from so they can successfully use flash teams in their own organizations Drawing on original research and industry examples this book will help readers to Recognize and source needed expertise within minutes Anticipate and plan team designs with AI Redesign team structures on the fly as projects evolve Industries are already being transformed by this new approach to teaming *Flash Teams* arms leaders managers and entrepreneurs with the tools they need to accomplish their goals with confidence speed and agility

Current Issues in Computing and Philosophy Adam Briggie, Katinka Waelbers, Philip A. E. Brey, 2008 The theme of this volume is the multi faceted computational turn that is occurring through the interaction of the disciplines of philosophy and computing In computer and information sciences there are significant conceptual and methodological questions that require reflection and analysis Moreover digital information and communication technologies have had tremendous impact on society which raises further philosophical questions This book tries to facilitate the task to continuously work to ensure that its diversity of perspectives and methods proves a source of strength and collaboration rather than a source of instability and disintegration The first three contributions explore the phenomenon of virtual worlds The next four focus on robots and artificial agents Then a group of chapters discusses the relation between human mentality and information processing in computers and the final section covers a broad range of issues at the interface of computers and society

Global Social Media Design Huatong Sun, 2020-01-02 Social media users fracture into tribes but social media ecosystems are globally interconnected technically socially culturally and economically At the crossroads Sun presents theory method and case studies to uncover the global interconnectedness of social media design and to bridge differences

She articulates a critical design framework with design tools to redress asymmetrical relations in everyday practice and provides three cross cultural social media design and use cases Facebook Japan Weibo and global competition of WhatsApp WeChat LINE and KakaoTalk She calls to reshape the crossroads into a design square where differences are nourished as resources where diverse discourses interact for innovation and where alternative epistemes thrive *Being There Together* Ralph Schroeder,2010-11-04 Virtual environments provide places for being there together for avatars to interact with each other in computer generated spaces They range from immersive systems in which people have life size tracked avatar bodies to large scale spaces such as Second Life where populations of users socialize in persistent virtual worlds This book draws together research on how people interact in virtual environments What difference does avatar appearance make How do avatars collaborate and play together How do the type of system and the space affect how people engage with each other How does interaction between avatars differ from face to face interaction What can social scientists learn from experiments and other studies of how people interact in virtual environments What are the ethical and social issues in doing this research and in the uses of this technology And how do virtual environments differ from other communication technologies such as videoconferencing systems and other new media This book is a state of the art survey of research on these topics and offers a framework for understanding this technology and its future implications *Information Technology Risk Management and Compliance in Modern Organizations* Gupta, Manish,Sharman, Raj,Walp, John,Mulgund, Pavankumar,2017-06-19 This title is an IGI Global Core Reference for 2019 as it is one of the best selling reference books within the Computer Science and IT subject area since 2017 providing the latest research on information management and information technology governance This publication provides real world solutions on identifying assessing and managing risks to IT systems infrastructure and processes making it an ideal publication for IT professionals scholars researchers and academicians Information Technology Risk Management and Compliance in Modern Organizations is a pivotal reference source featuring the latest scholarly research on the need for an effective chain of information management and clear principles of information technology governance Including extensive coverage on a broad range of topics such as compliance programs data leak prevention and security architecture this book is ideally designed for IT professionals scholars researchers and academicians seeking current research on risk management and compliance Interactions with Search Systems Ryen W.
