Information Structuring Cross Linguistic Perspective Linguistics:

Information Structure in a Cross-Linguistic Perspective ,2016-08-29 The present volume draws together contributions from a number of scholars with an interest in empirical cross linguistic description Most of the papers were first presented at the symposium Information Structure in a Cross linguistic Perspective held in Oslo in November December 2000 The descriptions are functionally oriented and their common focus is how information structure in a broad sense can be compared across languages Information structure has been approached in a variety of ways by the authors so as to give a broad picture of this fundamental principle of text production involving the way in which a speaker writer chooses to present a message in terms of given new information focus cohesion and point of view Central to much of the research is the problem of establishing criteria for isolating linguistic constraints on language use from cultural linguistic conventions in text production The linguistic comparison includes English German and or one of the Scandinavian languages with sidelights to other languages Most of the papers are text or corpus based and the ongoing work on parallel corpora in Scandinavia is reflected in several contributions

Information Structuring of Spoken Language from a Cross-linguistic Perspective M. M. Jocelyne Fernandez-Vest,Robert D. Van Valin,2015-12-14 Information structure and the organization of oral texts have been rarely studied crosslinguistically This book contains studies of the grammatical organization of information in languages from different areas e g Amazonian Finno Ugric South Asian from a variety of theoretical angles It will be a valuable resource for researchers investigating the interaction of morphosyntax and discourse in familiar and less familiar languages

Modeling Information Structure in a Cross-linguistic Perspective Sanghoun Song,2017 This study makes substantial contributions to both the theoretical and computational treatment of information structure with a specific focus on creating natural language processing applications such as multilingual machine translation systems The present study first provides cross linguistic findings in regards to information structure meanings and markings Building upon such findings the current model represents information structure within the HPSG MRS framework using Individual Constraints The primary goal of the present study is to create a multilingual grammar model of information structure for the LinGO Grammar Matrix system The present study explores the construction of a grammar library for creating customized grammar incorporating information structure and illustrates how the information structure based model improves performance of transfer based machine translation

Information Structuring of Spoken Language from a Cross-linguistic Perspective M. M. Jocelyne Fernandez-Vest,Robert D. Van Valin,2015-12-14 Information structure and the organization of oral texts have been rarely studied crosslinguistically This book contains studies of the grammatical organization of information in languages from different areas e g Amazonian Finno Ugric South Asian from a variety of theoretical angles It will be a valuable resource for researchers investigating the interaction of morphosyntax and discourse in familiar and less familiar languages

On the Role of Contrast in Information Structure Jorina Brysbaert,Karen Lahousse,2024-06-04 In

research on Information Structure there is an ongoing discussion about the role of contrast While most linguists consider contrast to be compatible with both focus and topic some argue that it is an autonomous IS category Contrast has been shown to be encoded by different linguistic means such as specific morphemes adverbials clefts prosodic cues Hence this concept is also related to other domains in particular morphosyntax and prosody The precise way in which they interact is however not yet entirely clear Moreover from a methodological point of view the identification and annotation of contrast in corpora is not straightforward This volume provides a selection of articles discussing the definition of contrast the importance of distinguishing different types of contrast the use of several encoding strategies and the annotation of contrast in corpora using the Question Under Discussion Model The contributions offer data on English French French Belgian Sign Language German Hindi Italian and Spanish

Information Structure in Lesser-described Languages Evangelia Adamou, Katharina Haude, Martine Vanhove, 2018-08-02 The articles compiled in this volume offer new insights into the wealth of prosodic and syntactic phenomena involved in the encoding of information structure categories They present data from languages which are rarely if ever taken into account in the most prominent approaches in information structure theory and which belong to the Afroasiatic Amerindian Australian Caucasian and Niger Congo language stocks In addition to the significant descriptive value of these pioneering contributions several studies also draw attention to previously undescribed or typologically rare phenomena By adapting a variety of methods to under described and endangered languages ranging from experimental to naturalistic corpus studies this volume also aims to serve as an invitation for further research in this direction

On Information Structure, Meaning and Form Kerstin Schwabe, Susanne Winkler, 2007 This collection of articles offers a new and compelling perspective on the interface connecting syntax phonology semantics and pragmatics At the core of this volume is the hypothesis that information structure represents the common interface of these grammatical components Information structure is investigated here from different theoretical viewpoints yielding typologically relevant information and structural generalizations In the volume's introductory chapter the editors identify two central approaches to information structure the formal and the interpretive view The remainder of the book is organized accordingly The first part examines information structure and grammar concentrating on generalizations across languages The second part investigates information structure and pragmatics concentrating on clause structure and context Through concrete analyses of topic focus and related phenomena across different languages the contributors add new and convincing evidence to the research on information structure

Linguists of Tomorrow Kleanthes K. Grohmann, Aljona Shelkova, 2012-04-25 This volume is a selection of papers presented at Linguists of Tomorrow the 1st Cyprus Postgraduate Conference in Theoretical and Applied Linguistics held at the University of Cyprus on 7-8 May 2010 The collection includes nine chapters by postgraduate students of linguistics as well as two illustrious keynote papers by Prof Barbara Lust and Prof Thomas McFadden The topics range from theoretical linguistics syntax semantics morphology and phonology to psycholinguistics

Comparative and Contrastive Studies of Information Structure Carsten Breul,Edward Göbbel,2010-09-09 This volume presents original comparative and contrastive research into various aspects of information structure topic focus contrastivity givenness anaphoricity as well as into forms and structures whose realisation depends on information structural factors clefts dislocations reflexives null subjects prosodic features interrogatives in a number of different languages Catalan English French Georgian German Hebrew Hungarian Each contribution emphasises differences or commonalities between the languages under investigation with respect to the realisation of information structural categories or with respect to the information structural implications of a given form or structure The specific comparative contrastive perspective of the volume makes a substantial contribution towards a better understanding of language specific and universal aspects of information structure It raises significant questions and provides solutions for the formal representation and the functional properties of information structural categories

Phase Theory Ángel J. Gallego, 2010 This book provides a detailed and up to date review of the framework of phases Chomsky 2000 and subsequent work It explores the interaction between the narrow syntactic computation and the external systems from a minimalist perspective As has sometimes been noted Phase Theory is the current way to study the cyclic nature of the system and phases are therefore the natural locality hallmark being directly relevant for phenomena such as binding agreement movement islands reconstruction or stress assignment This work discusses the different approaches to phases that have been proposed in the recent literature arguing in favor of the thesis that the points of cyclic transfer are to be related to uninterpretable morphology the features on the heads C and v This take on phases is adopted in order to investigate raising structures binding subjunctive dependents and object shift word order in Romance languages as well as the nature of islands

Clitics in Greek Marios Mavrogiorgos, 2010 This monograph investigates the morpho syntactic and other properties of clitic pronouns in Greek and offers a grammar of proclisis and enclisis in light of Chomsky's 1995 2001a 2005 Minimalist Program It explores the nature of clitics as syntactic topicalizers which are probed by structurally higher verbal heads to which they move and into which they incorporate morpho syntactically A theory is advanced according to which cliticization derives from syntactic agreement between the phi features of a clitic pronoun and a phase head v in the case of proclisis and CM in the case of enclisis Incorporation of the clitic into its host is argued to depend on two factors i e the fact that the clitic only contains a subset of the features of its host and the fact that the edge of the host is accessible Also the syntax of strong pronouns and their relation to clitics of negated imperatives of surrogate imperatives and of free clitic ordering in Greek enclisis are also discussed This monograph would appeal to syntacticians and morphologists as well as to those interested in Greek and more generally in clitic syntax

The Processing of Events Oliver Bott, 2010 Synthesizing ideas from event semantics and psycholinguistics this monograph provides a new perspective on the processing of linguistic aspect and aspectual coercion Confronting alternative semantic accounts with experimental evidence the author develops a comprehensive model of online aspectual interpretation The first part of the book critically reviews competing theoretical accounts of aspectual coercion As an analytical tool the author introduces a computational model based on the event calculus by Hamm van Lambalgen 2005 which makes use of planning formalisms from artificial intelligence Detailed predictions from this framework are then tested in the experimental work reported in the second part The focus here is on such questions as Is aspectual coercion a uniform phenomenon or must we distinguish different types Is aspect processed incrementally or is it computed only at the clause boundary And finally what insights can event related potentials yield about how the brain resolves local aspectual mismatch
