The bulk of the book deals with the technique of injection joint by joint. The text is laid out so that each page of text describing the technique is matched by a facing page of illustrations illustrating the procedure. For each joint there is a 4 colour line drawing of the anatomy of the joint and a full colour photograph showing the surface anatomy position for injection. The actual technique of giving the injection and location, the correct anatomical position for the insertion of the needle is demonstrated and explained on the CD Rom. The book features a Step by step guide to injection techniques. Highly illustrated with 4 colour line drawings and full colour photographs showing the area for needle insertion and the correct position for the needle. Layout allows text and relevant illustrations to be on facing pages. Canadian binding with PPC cover combines protective cover with ability to lie the text flat for easy referral.
