Innocence Slaughtered Jean Pascal Zanders, 2016 **Innocence Slaughtered** Jean Pascal Zanders, 2015 *Land Warfare since 1860* Jeremy Black, 2018-08-10 This cogent global history traces the evolution of land warfare since the start of the Crimean War Jeremy Black argues that although it has always been critical to the outcome of conflicts worldwide land warfare has become undervalued in comparison to air power in modern military thinking In practice land warfare was crucial during the American Civil War the two world wars and the conflicts of the Cold War Indeed the revival of great power confrontation has led to an urgent need to re examine the entire contemporary period Looking to the future the book shows convincingly that we must consider the nature of the military for non state actors as well for as the major powers Ultimately Black contends there is no substitute for the control over territory provided by boots on the ground **The World at War, 1914-1945** Jeremy Black, 2019-04-03 This text provides an innovative global military history that joins three periods World War I the interwar years and World War II Jeremy Black offers a comprehensive survey of both wars comparing continuities and differences He traces the causes of each war and assesses land sea and air warfare as separate dimensions He argues that the unprecedented nature of the two wars owed much to the demographic and industrial strength of the states involved and their ability and determination to mobilize vast resources Yet the demands of the world wars also posed major difficulties not simply in sustaining the struggle but also in conceiving of practical strategies and operational methods in the heat and competition of ever evolving conflict In this process resources skills leadership morale and alliance cohesion all proved significant In addition to his military focus Black considers other key dimensions of the conflicts especially political and social influences and impacts He thoroughly integrates the interwar years tracing the significant continuities between the two world wars He emphasizes how essential American financial industrial agricultural and energy resources were to the Allies both before and after the United States entered each war Bringing the two world wars to life Black sheds light not only on both as individual conflicts but also on the interwoven relationships between the two **The Hague Conferences and International Politics, 1898-1915** Maartje Abbenhuis, 2018-10-18 Beginning with the extraordinary rescript by Tsar Nicholas II in August 1898 calling the world s governments to a disarmament conference this book charts the history of the two Hague peace conferences of 1899 and 1907 and the third conference of 1915 that was never held using diplomatic correspondence newspaper reports contemporary publications and the papers of internationalist organizations and peace activists Focusing on the international media frenzy that developed around them Maartje Abbenhuis provides a new angle on the conferences Highlighting the conventions that they brought about she demonstrates how The Hague set the tone for international politics in the years leading up to the First World War permeating media reports and shaping the views and activities of key organizations such as the inter parliamentary union the international council of women and the Institut de droit international Institute of International Law Based on extensive archival research in the Netherlands Great Britain

Switzerland and the United States alongside contemporary publications in a range of languages this book considers the history of the Hague conferences in a new way and presents a powerful case for the importance of The Hague conferences in shaping twentieth century international politics *Conflict Landscapes* Nicholas J. Saunders, Paul Cornish, 2021-06-24

Conflict Landscapes explores the long under acknowledged and under investigated aspects of where and how modern conflict landscapes interact and conjoin with pre twentieth century places activities and beliefs as well as with individuals and groups Investigating and understanding the often unpredictable power and legacies of landscapes that have seen and often still viscerally embody the consequences of mass death and destruction the book shows through these landscapes the power of destruction to preserve refocus and often reconfigure the past Responding to the complexity of modern conflict the book offers a coherent integrated and sensitized hybrid approach which calls on different disciplines where they overlap in a shared common terrain Dealing with issues such as memory identity emotion and wellbeing the chapters tease out the human experience of modern conflict and its relationship to landscape *Conflict Landscapes* will appeal to a wide range of disciplines involved in studying conflict such as archaeology anthropology material culture studies art history cultural history cultural geography military history and heritage and museum studies **Asia in Flanders Fields** Dominiek Dendooven, 2022-01-28

The First World War brought peoples from five continents to support the British and French Allies on the Western Front Many were from colonial territories in the British and French empires and the largest contingents were Indians and Chinese some 140 000 It is a story of the encounter with the European other including the civilian European local populations often marred by racism discrimination and xenophobia both inside and outside the military command but also lightened by moving and enduring human social relationships The vital contribution to the Allies and the huge sacrifices involved were scarcely recognised at the Paris Peace Conference in 1918 or the post war victory celebrations and this led to resentment see huge media coverage in 2021 The effect of the European other experience enhanced Asian political awareness and self confidence and stimulated anti imperialism and proto nationalism This is a vivid and original contribution to imperial decline from the First World War and the originality of the work is enhanced by rare sources culled from original documents and local European fieldwork in French German and Flemish *Innocent Civilians* C. McKeogh, 2002-04-15

Why is it that soldiers may be killed in war but civilians may not be killed By tracing the evolution of the principle of non combatant immunity in Western thought from its medieval religious origins to its modern legal status Colm McKeogh attempts to answer this question In doing so he highlights the unsuccessful attempts to reconcile warfare with our civilization's most fundamental principles of justice *Hierro y sangre* Peter, 2023-05-24

deutsche Geschichte bestimmt Bismarcks berühmte Rede Blut und Eisen zeigt wie sehr der Militarismus ein integraler Bestandteil der deutschen Geschichte ist. Er prägt die Art und Weise wie Politik gemacht und Kriege geführt wurden und das nicht erst seit der Entstehung des deutschen Nationalstaates. Deshalb greift die in vielen Bereichen zu Militär und Geschichte gepflegte Verengung des Blicks auf Aufstieg und Fall Preußens und die Zeit von 1914 bis 1945 zu kurz. Peter H. Wilson zeigt in seinem monumentalen Werk wie wichtig es ist, die deutsche Militärgeschichte in einen größeren Zusammenhang zu stellen.

Long Time Passing Myra MacPherson, 2009-04-20 This new edition of a classic book on the impact of the Vietnam War on Americans reintroduces the haunted voices of the Vietnam era to a new generation of readers. Based on more than 500 interviews, *Long Time Passing* is journalist Myra MacPherson's acclaimed exploration of the wounds, pride and guilt of those who fought and those who refused to fight the war that continues to envelop the psyche of this nation. In a new introduction, Myra MacPherson reflects on what has changed and what hasn't in the years since these interviews were conducted, explains the key points of reference from the 1980s that feature prominently in them and brings the stories of her principal characters up to date. A haunting chorus of voices, a moving, deeply disturbing evocation of an era. *San Francisco Chronicle*. A brilliant and necessary book, this stunning depiction of Vietnam's bitter fruit is calculated to agitate even the most complacent American. *Philadelphia Inquirer*. There have been many books on the Vietnam War, but few have captured its second life as memory better than *Long Time Passing*. *Washington Post Book World*. Enthralling reading, full of deep and strong emotions. *New York Times*.

The Moral Fool Hans-Georg Moeller, 2009-07-15 Justice, equality and righteousness: these are some of our greatest moral convictions. Yet in times of social conflict, morals can become rigid, making religious war, ethnic cleansing and political purges possible. Morality, therefore, can be viewed as pathology, a rhetorical, psychological and social tool that is used and abused as a weapon. An expert on Eastern philosophies and social systems theory, Hans-Georg Moeller questions the perceived goodness of morality and those who claim morality is inherently positive. Critiquing the ethical fanaticism of Western moralists such as Immanuel Kant, Lawrence Kohlberg, John Rawls and the utilitarians, Moeller points to the absurd fundamentalisms and impracticable prescriptions arising from definitions of good. Instead, he advances a theory of moral foolishness or moral asceticism extracted from the amoral philosophers of East Asia and such thinkers as Ludwig Wittgenstein and Niklas Luhmann. The moral fool doesn't understand why ethics are necessarily good and he isn't convinced that the moral perspective is always positive. In this way, he is like most people, and Moeller defends this foolishness against ethical pathologies that support the death penalty, just wars and even Jerry Springer's crude moral theater. Comparing and contrasting the religious philosophies of Christianity, Daoism and Zen Buddhism, Moeller presents a persuasive argument in favor of amorality.

Pike, 2017-10-03 *For the Wild* explores the ways in which the commitments of radical environmental and animal rights activists develop through powerful experiences with the more-than-human world during childhood and young adulthood. Embattled Home Fronts Karsten H. Piep, 2009-01-01 Embattled Home Fronts is an inquiry into the highly conflicted US American experience of World War I as it plays itself out in the diverse body of novelistic works to which it has given rise and by which it has been in turn shaped and commemorated As such this book naturally concerns itself with the formal aspects of artistic war representation But rather than merely endeavoring to illustrate how American writers from various backgrounds chose to depict World War I the present work seeks to uncover the particular ideologies and political practices that inform these representational choices To this end Embattled Home Fronts examines both canonized and marginalized US American World War I novels within the context of contemporaneous debates over shifting

class gender and race relations The book contends that American literary representations of the Great War are shaped less by universal insights into modern society's self-destructiveness than by concerted efforts to fashion class gender and race specific experiences of warfare in ways that stabilize and heighten political group identities In moving beyond the customary focus on ironic war representations *Embattled Home Fronts* illustrates that the representational and ideological battles fought within American World War I literature not only shed light on the emergence of powerful identity political concepts such as the New Woman and the New Negro but also speak to the reappearance of utopian communitarian and social protest fictions in the early 1930s This study *Embattled Home Fronts* provides a new understanding of the relationship between war literature and home front politics that should be of interest to students and scholars working from a variety of disciplines and perspectives
