Machines As The Measure Of Men Machines As The Measure Of Men:

Machines as the Measure of Men Michael Adas, 1989 This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies as well as global technology and politics enter into conversation with his original arguments

Machines as the Measure of Men Michael Adas, 2005 *Machines as the Measure of Men* Michael Adas, 2015-06-04 Over the past five centuries advances in Western understanding of and control over the material world have strongly influenced European responses to non Western peoples and cultures In *Machines as the Measure of Men* Michael Adas explores the ways in which European perceptions of their scientific and technological superiority shaped their interactions with people overseas Adopting a broad comparative perspective he analyzes European responses to the cultures of sub Saharan Africa India and China cultures that they judged to represent lower levels of material mastery and social organization Beginning with the early decades of overseas expansion in the sixteenth century Adas traces the impact of scientific and technological advances on European attitudes toward Asians and Africans and on their policies for dealing with colonized societies He concentrates on British and French thinking in the nineteenth century when he maintains scientific and technological measures of human worth played a critical role in shaping arguments for the notion of racial supremacy and the civilizing mission ideology which were used to justify Europe's domination of the globe Finally he examines the reasons why many Europeans grew dissatisfied with and even rejected this gauge of human worth after World War I and explains why it has remained important to Americans Showing how the scientific and industrial revolutions contributed to the development of European imperialist ideologies *Machines as the Measure of Men* highlights the cultural factors that have nurtured disdain for non Western accomplishments and value systems It also indicates how these attitudes in shaping policies that restricted the diffusion of scientific knowledge have perpetuated themselves and contributed significantly to chronic underdevelopment throughout the developing world Adas's far reaching and provocative book will be compelling reading for all who are concerned about the history of Western imperialism and its legacies First published to wide acclaim in 1989 *Machines as the Measure of Men* is now available in a new edition that features a preface by the author that discusses how subsequent developments in gender and race studies as well as global technology and politics enter into conversation with his original arguments

Racism Kevin Reilly, Stephen Kaufman, Angela Bodino, 2003 Racism has existed throughout the world for centuries and has been at the root of innumerable conflicts and human tragedies including war genocide slavery bigotry and discrimination Defined broadly racism has had many forms and effects from caste prejudice in India and mass extermination in Tasmania to slavery in the Americas and the Holocaust in Europe Put simply racism has been one of the overriding forces in world history for more than a millennium This book provides a global perspective of

racism in its myriad forms Consisting of twelve parts and fifty one articles it focuses on racism worldwide over the past thousand years It includes three types of articles original documents scholarly essays and journalistic accounts *Science, Technology, Imperialism, and War* Jyoti Bhusan Das Gupta, 2007 The Volume Science Technology Imperialism And War Interlinks The Concerned Themes To Present A Coherent Analysis Of The Development Of Related Ideas And Institutions In The Subcontinent The Chapters On Science Therefore Look At The Cognitive And Socio Historical Aspects Of Science Relating The Same With The Establishment And Spread Of Imperialism In India With Its Application To Develop Technologies And With The Use Of Such Technologies To Fund The Major Preoccupation Of Imperialism War Likewise The Section On Technology Leads The Reader To A Search For Its Very Probable Links With Imperialism And War The Section On Imperialism Offers Four Themes In The Edited Volume The First One Deals With Its Theories The Second With Its Link With Colonialism And The Third And The Fourth Follow Its Manifestation In The Russian And British Adventures Chiefly In Central Asia And India The Dependence Of Imperialism On War Looms Large War The Concluding Theme Of This Exercise Is The Saturation Point Of Human Efforts To Subjugate And Dominate Others The Scholars Writing In This Section Critically Survey The Various Kinds Of War Conventional Limited And Nuclear And A Detailed And Insightful Analysis Of The Cold War By The Editor Completes The Picture This Volume Will Prove Invaluable To Scholars And Students Of South Asian Studies History Political Science And International Relations And Defence Studies Alike Civilizational Discourses in Weapons Control Ritu Mathur, 2020-07-11 This book seeks to decolonize practices of arms control and disarmament In this endeavor it seeks to problematize our understanding of time and civilization as rhetorical resources The need for such an undertaking can be premised on the claim that while problems of modernity ethnocentrism and universalism are now a central concern within the field of international relations these ideas are scarcely debated or contested within the field of arms control and disarmament The singular focus on technological innovations and specific policy oriented agreements in practices of arms control and disarmament appears to stymie the need for such engagements This book is an invitation to explore intersecting discourses on colonialism racialism nationalism and humanitarianism within a historically grounded terrain of weapons control An understanding of these practices is vital not to prescribe any standards of civilization or exceptionalism in weapons control but to be cognizant through critique of the dangers embedded in any effort at reconstellating the constitutional nuclear order **The Machines of Sex Research** Donna J. Drucker, 2013-07-04 The Machines of Sex Research describes how researchers worldwide integrated technology into studies of human sexuality in the postwar era The machines they invented made new ways of seeing bodies possible Some researchers who studied men used machines like penile strain gauges to police deviant male sexuality others used less painful devices like penis cameras to study women's sexual responses and map the physiology of their arousal and orgasm While researchers used the findings from their technological innovations to propose their own views of how people should view their bodies and should manage their sexual

lives their readers interpreted their findings to enact their own visions of sexuality Drucker shows how the use of machines in sex research provided some of the intellectual underpinnings of the sexual revolution and the women s and gay rights movements and in turn how the sex research community developed new machines for investigations that would enhance sexual happiness rather than constrict it The Machines of Sex Research is a key read for those interested in the intersections between human sexuality technology and twentieth century social movements Describes the little known history of the machines of human sex research in the postwar era Shows how researchers worldwide invented and used machines to study human sexuality and the body in new ways and how they used and improved each other s designs Relates the relationship between the machines of sex research to Cold War sexualities and gender and sexual liberation movements

Men, Machines, and War Ronald Haycock,Keith Neilson,2006-01-01 Using examples from the last two centuries this collection of essays discusses the close links between technology and war In the opening essay distinguished historian William H McNeill demonstrates the extent to which military technology has often led to differentiations among people both within and between societies The other studies examine various aspects of weapons technology drawing on the history of the armed forces of Britain Prussia and Australia among others Some of these illustrate how the adoption of new weaponry frequently depended as much on national pride and party politics as it did on the purely technical merits of the weapons involved that financial considerations became increasingly primary in technological developments in British army after World War I and that decisions made prior to 1939 about the aviation technology to be developed for military purposes largely determined what kind of the RAF was able to fight The chapter by Dr G R Lindsay the Chief of the Operational Research and Analysis Establishment at the Department of National Defence Headquarters in Ottawa makes the case that with nuclear weapons added to the scene the impact of technology on international security has never been as great as at present and that the competition of nations seeking the technological edge in weaponry threatens to destabilize the precarious balance that has existed since 1945
