Economics of Gender Inequality Michael Grimm,Isabel Günther,2020-03-06 Stephan Klasen is considered one of the most distinguished scholars on gender economics in the 21st century Over the past 25 years he has tirelessly worked to understand the complex phenomena of gender inequality From counting the number of missing women in the world and shedding light on why women go missing to showing that leaving girls out of school not only deprives them but also robs society of the opportunity to thrive on the talents of its entire population from understanding why equal rights and rising incomes everywhere have not resulted in women participating more at work to measuring gender inequality in its various dimensions This volume a collection of some of Stephan Klasen s most important writings on the topic of gender inequality honours his academic life and gives the reader an in depth insight into both what we know and don t yet know about the economics of gender inequality

The History of Development Gilbert Rist,2002-10 With all its hopes of a more just and materially prosperous world development has fascinated societies in both North and South Looking at this collective fancy in retrospect Gilbert Rist shows the underlying similarities of its various theories and strategies and their shared inability to transform the world He argues persuasively that development has always been a kind of collective delusion which in reality has simply promoted a widening of market relations despite the good intentions of its advocates

A Gendered African Perspective on Christian Social Ethics Joseph Loïc Mben, S.J.,2021-03-09 Combining Catholic social teaching feminist and African liberation theology and the social sciences Joseph Lo c Mben SJ develops a contextual gendered African Christian social ethic that addresses the oppression and marginalization of working women in Sub Saharan Africa He focuses primarily on African women from working and poor classes living in either urban or rural settings particularly in Cameroon and thus shows the necessity of inflecting Catholic social teaching along the differential of gender

India Social Development Report 2023 Indira Hirway,2024-01-20 This report highlights that gender inequalities and women s subordination in India are caused by two formidable macro structures patriarchy and the exclusion of unpaid work from the macro economy Both these structures reinforce each other and negatively impact women s empowerment Patriarchy imposes subordination on

women and forces a disproportionately higher share of unpaid domestic services and unpaid care onto them This is unfair and unjust a violation of basic human rights Other structures like race religion and caste cut across these main structures The selected papers in this report show how patriarchy causes gender inequalities in all critical dimensions of women s life on the one hand and how unpaid domestic services and unpaid care sustains the macro economy and its growth on the other The contributors discuss pathways to integrate unpaid work with the macro economy such that the strength of patriarchy declines and at the same time gender equality is promoted To put it differently unless the structures are addressed by integrating unpaid work inequalities cannot be addressed effectively The report emphasizes that this is the only way to move to real macroeconomics The papers have explored pathways to break these structures gradually to achieve gender equality and empower women Though the path is challenging it is feasible to reach the goal of pervasive gender equality

Feminist Periodicals ,2006 **The British National Bibliography** Arthur James Wells,2003 Mulier oeconomica Fernando Antonio Noriega Ureña,Cristhian Villegas Herrera,2024-02-19 Desde los or genes mismos de las comunidades humanas la mujer ha sido social e institucionalmente asumida como la expectativa racional de una mujer madre independientemente de que en alg n momento de su vida se convirtiera en tal La comunidad y sus instituciones la han definido desde su nacimiento como un ser humano con probabilidad positiva de ser madre en alg n momento y en consecuencia le han asignado salvo muy contadas excepciones en la historia y en la geograf a mundial la responsabilidad de

primera instancia de sufragar los costos de la reproducción cuantitativa y cualitativa de la sociedad. Bajo ese estatuto la cooperación del género complementario para compartir esos costos ha sido establecida en condiciones asimétricas y desventajosas para la mujer. Los derechos de propiedad, las oportunidades laborales y de desarrollo social e institucional, así como el ejercicio de las libertades elementales de decisión y acción se han concentrado fuera de las esferas de desempeño de las mujeres y les han sido gravemente restringidos a ellas. Se trata de un libro destinado a renovar la agenda de investigación de la economía en materia de género y preparado en su estructura para formar cuadros académicos en los fundamentos de la teoría económica de la mujer y en la definición de criterios de políticas fiscal, monetaria y cambiaria con orientación reivindicativa de género.

Economía política feminista
Astrid Agenjo Calderón, 2021-03-12. La economía política feminista constituye una aproximación crítica y alternativa a los análisis de la economía convencional y a las deficiencias estructurales de un sistema capitalista heteropatriarcal y racista que ha puesto en jaque la sostenibilidad de la vida, causando y agravando el conflicto capital-vida. La financiarización descontrolada, la mercantilización de cada vez más procesos de la vida íntima, la privatización creciente de medios de producción y sectores económicos, la invisibilización de la economía de cuidados o la sobreexplotación de una fuerza de trabajo feminizada y precaria son algunos de los aspectos abordados por la economía política feminista. Esta corriente económica pone la vida sostenible y digna en el centro. Articula sus principios en torno a un feminismo del 99% que recupera el interés por las cuestiones redistributivas y por las preocupaciones medioambientales, negociando continuamente sobre las cuestiones del poder y la diferencia. Y se alinea con las posiciones interseccionales que entienden que la realidad socioeconómica está mediada por una multiplicidad de factores de género, sexualidad, raza o etnia, localización, acceso a recursos que no deben ignorarse si se quieren afrontar los problemas sistémicos en un contexto global de complejidad e incertidumbre. Trasladando los aportaciones teóricas de la economía política feminista a los análisis de las tendencias de la economía global, su autora aborda en profundidad y mediante un completo repaso a la literatura especializada las claves para entender las causas y efectos del colapso ecosocial. Ofrece en definitiva una rigurosa propuesta teórica que pueda ser de utilidad para concebir nuevos horizontes emancipatorios que prioricen la sostenibilidad de la vida en la organización del sistema económico.
