## **Macroergonomics Macroergonomics:**

**Macroergonomics** Hal W. Hendrick, Brian Kleiner, 2002-04-01 This book's primary objective is to provide a comprehensive coverage of ergonomics in overall work system analysis and design. It provides a summary of the historical development of macroergonomics. It explains how an understanding of macroergonomics can lead to improvements in such things as reducing work-related lost time accidents and describes the methods and tools used in work system analysis and design. Throughout the integrating theme is that the full potential of an organization in terms of productivity, safety, health, and Quality of Work Life (QWL) can't be met unless the overall work system is designed to conform with the characteristics of its technology, personnel, subsystem, and the external environment upon which it depends for its survival and success. Using a sociotechnical systems approach, this text discusses the application of macroergonomics to training, system development, hazard management, technology transfer, large-scale organizational change, projects, office and factory automation, community planning and development, and job design. For each of these applications, actual case examples will be included. The book will appeal to teachers of introductory human factors/ergonomics courses as a supplemental text or as the primary text for a course fully devoted to macroergonomics. In addition, it should also appeal to practicing ergonomists internationally as a must-add to their personal professional libraries. *Macroergonomics for Manufacturing Systems* Arturo Realyvásquez

Vargas, Aide Aracely Maldonado-Macias, Jorge Luis García-Alcaraz, 2017-10-24 This book introduces the main concepts of manufacturing systems and presents several evaluation approaches for these systems. The relevant macroergonomics methods are summarized, and the theoretical framework for the Macroergonomic Compatibility construct is explained. This book presents a Macroergonomic Compatibility Model which proposes an instrument in the form of a Macroergonomic Compatibility Index. The authors introduce a methodology to obtain a novel Macroergonomic Compatibility Index that enables manufacturing companies to assess and follow their progress on the implementation of macroergonomics practices.
