**The Hacker's Guide To Getting To The Top Of Google Search** Gino Dino, 2012-04-04 ABOUT THE BOOK Who doesn't know Google? From its software and operating system products to its core search functionality, Google is close to omnipresent in our technologically interconnected world. A professor of mine once mentioned Google back when I was studying computer science. He said the search algorithm was brilliant, but the minds behind the mathematical feat were not so adept at web design. This explains Google Search's simplistic search box and buttons. Not that any fancy superfluous design was needed, since search was the main function of the tool, and Google delivered. Indeed, Google delivered and became one of the largest and most reputable companies on earth today. Spearheading the evolution of search engines for an ever-growing Internet, Google helped bring about the advent of a new industry that developed side-by-side with Internet marketing: search engine optimization (SEO). Ranking among the top results in Google's search results page is a marketer's dream goal and a businessman's dream period. There was a documented case back in Google's early years where a small business website was able to become the top result for a particular keyword for just one day and ended up raking in an impressive 20,000 in profit. The numbers speak to what a powerful tool Google is for generating traffic to websites. The numbers tell how lucrative it can be if you can hack your way to the top of Google Search.
