Short chapters within the book easily and simply present the knowledge for success on your own terms The success mosaic painted has three key underlying elements Commitment to your objectives Consistency of appropriate action Belief in yourself and your desires The unifying thread is to perceive your life s journey using a compass rather than being governed by a map A map is useful to show you the lay of the land but it is not the land If you are glued to the rigidity of the map you will not know when opportunity knocks softly Be alive awake and alert to infinite possibilities The compass approach acknowledges the direction you want your life to take but provides flexibility to grasp unexpected opportunities Your desires and dreams often appear impossible of achievement Magic in this context is seeing an event take place that initially seems impossible Experience your magic of success *The Intuitive Investor* Jason Apollo Voss,2010-10 Successful Wall Street fund manager retired at age 35 guides investors to use intuitive and creative right brained processes to complement traditional left brain financial analysis Author describes his principles based on spiritual insights and provides professional anecdotes to support his theories Provided by publisher **On Niebuhr** Langdon Gilkey,2001 As the eminent theologian Langdon Gilkey demonstrates in this book Niebuhr was able to provide such a persuasive answer because his social understanding was a theological understanding one accomplished by viewing human being in relation to God as well as in its political and economic relations This Biblical understanding of human nature while acknowledging the often deep ambiguity and hypocrisy of the real historical world also revealed a divine hand guiding that history To Niebuhr it is God s participation in history that gives it meaning and a promise of fulfillment and presents believers with the possibility of a social realism that maintains its moral nerve rather than succumbing to cynicism or despair *She* Muska Dee,101-01-01 She is a heartfelt collection of sixty poems that beautifully celebrates the strength grace and emotional depth of women Each poem captures a unique aspect of womanhood love heartbreak endurance compassion and unshakable courage With lyrical simplicity and emotional clarity the verses illuminate women as dreamers nurturers fighters and silent warriors who carry the weight of generations while still radiating warmth and wisdom This book explores the intimate landscapes of a woman s inner world giving voice to her struggles hopes and triumphs Whether depicting a quiet moment of reflection or a powerful surge of resilience She offers readers a moving tribute to the complexities and beauty of feminine existence It invites readers to connect deeply with their own experiences or those of the women in their lives More than a poetry book She is a celebration an acknowledgment and a call to honor the soul of womanhood *Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma* Mohammad H. Tamdgidi,2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger s Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread

out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyebbeh Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that

get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinarity through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of *Disciplinary Decadence Living Thought* in *Trying Times* Routledge Paradigm 2006 and *Freedom Justice and Decolonization* Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social theory for a 21st century decolonial social science A must read Professor Ramon Grosfoguel University of California at Berkeley Tamdgidi's *Liberating Sociology* succeeds in adding physical structures to the breadth of the world changing vision of C Wright Mills the man who mentored me at Columbia Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation so does *Liberating Sociology* liberate the infinite possibilities inherent in us Given our isolation in the Coronavirus era we have time to follow Tamdgidi in his journey into the depth of inner space where few men have gone before It is there that we can gain emotional strength just as Churchill Roosevelt and Mandela empowered themselves That personal development was needed to address not only their own personal problems but also the mammoth problems of their societies We must learn to do the same Bernard Phillips Emeritus Sociology Professor Boston University

metaphysical core of Spinoza's philosophy its epistemology and its ramifications for his much disputed attitude towards religion Opening with a discussion of Spinoza's historical and philosophical location as the appropriate context for the interpretation of his work the book goes on to present a non logical reading of Spinoza's metaphysics a consideration of Spinoza's radical repudiation of Cartesian subjectivism and an examination of how Spinoza wanted religion to be understood in the context of his wider thinking and the influence of his non Christian background Mason also assesses Spinoza's significance and importance for philosophy now
