William M. Ulrich

Information Systems Transformation Architecture Driven Modernization Case Studies The Mkomg Press:

Information Systems Transformation William M. Ulrich, Philip Newcomb, 2010 Architecture Driven Modernization ADM restores the value of entrenched systems by capturing and retooling various aspects of existing application environments allowing old infrastructures to deliver renewed value and align effectively with enterprise strategies and business architectures This book provides a practical guide to organizations seeking ways to understand and leverage existing systems as part of their information management strategies It includes an introduction to ADM disciplines tools and standards as well as a series of scenarios outlining how ADM is applied to various initiatives Drawing upon lessons learned from real modernization projects it distills the theory and explains principles processes and best practices for every industry Resource description p

Information System Transformation William M. Ulrich, 2010 *Bulletin of the Atomic Scientists*, 1969-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

CAD/CAM Abstracts, 1990 **PAIS International in Print** Catherine Korvin, 2003-05 This book contains bibliographic references with abstracts and subject headings to public and social policy literature and to world politics published in print and electronic formats international focus

Enterprise Architecture and New Generation Information Systems Dimitris N. Chorafas, 2002 Based on an extensive research project done by the author in the United States Britain Germany France Switzerland Sweden and Austria from December 1999 to June 2001 Enterprise Architecture and New Generation Information Systems focuses on four main themes Next Generation Information Technology The Likely Technologies of this Decade Enterprise Computing The Internet as the 21st Century's Answer to Merchandising While the majority of books presently available on information systems are written from the viewpoint of system analysis programming or common applications this text Brings to the reader's attention the importance of organization and infrastructure Presents a wealth of case studies to explain the need for reengineering and restructuring Details the latest advances which influence the implementation of advanced technology Written in a simple comprehensive manner without specific prerequisites and data processing jargon with concepts and case studies properly explained this book addresses itself to practitioners in computer technology telecommunications and software development who are interested in acquiring skills through knowledge of the most advanced applications Enterprise Architecture and New Generation Information Systems will prove appealing to every person charged with planning developing applying and delivering advanced information systems architectural solutions and programming products

A Model Driven Approach to Modernizing Legacy Information Systems Sander Goos, 2012-05 The aging of software is a lingering problem for many companies We know that in new projects Model Driven Engineering can be used to prevent this aging in the future However this does not solve the problems we have today with legacy information systems We propose a general method for the modernization of legacy information systems by

transforming these systems into model driven systems To accomplish a transformation into a model driven system first a model is extracted from the legacy system This model is then transformed into a model driven system using Model Driven Engineering The method is not limited to the data model of the legacy system but is applicable to the entire system It has a best effort character and allows for automatic traceability All these properties are validated with the Thinkwise Software Factory Thinkwise Software develops technical innovations to create smart software applications These applications are self learning easy to use and have an unlimited life expectancy At the time of writing the techniques discussed in this work are implemented further at Thinkwise and have proven their effectiveness in several customer projects

Search-based Information Systems Migration, 2019 Information systems are built to last for decades however the reality suggests otherwise Companies are often pushed to modernize their systems to reduce costs meet new policies improve the security or to be more competitive Model driven engineering MDE approaches are used in several successful projects to migrate systems MDE raises the level of abstraction for complex systems by relying on models as first class entities These models are maintained and transformed using model transformations MT which are expressed by means of transformation rules to transform models from source to target meta models We proposed an intelligent computational search approach to automatically modularize MT We took inspiration from a well defined quality assessment model for object oriented design to propose a quality assessment model for MT in particular The results showed a 45% improvement in the developer s speed to detect or fix bugs and developers made 40% less errors when performing a task with the optimized version
