Directions: Read the passage below. After reading the passage, answer the questions as best you can.

### SHARKS VS. DOLPHINS

**Sharks**

Sharks are considered a type of fish, not a mammal. This means they have gills that they use to breathe underwater and lay eggs. They use their gills to extract oxygen from the water. Did you know there are over 400 species of sharks? Sharks have been around for a long time - some are older than dinosaurs! That's over 100 million years old! Even though sharks are not the most intelligent animals in the sea, they are strong and mighty. They use their power to hunt for food and protect themselves from other animals.

**Dolphins**

Unlike sharks, dolphins are considered mammals. This means they are like people and many other animals on land. Like other mammals, they give live births and nurse their young with milk. They also help protect their young until they are old enough to defend themselves. Dolphins use a blowhole for breathing; instead of gills, they need to return to the surface for oxygen.

After reading the passage, answer the questions as best you can.

1. How are sharks and dolphins different?

A. Sharks are fish and dolphins are mammals.  
B. Sharks are older than dolphins.  
C. Sharks and dolphins are very different.

2. What is the main point of paragraph 2?

A. A shark is a fish.  
B. Sharks are strong and use power.

3. How are sharks and dolphins different?
