Building Communication Capacity to Counter Infectious Disease Threats National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Global Health,Forum on Microbial Threats,2017-06-14 Building communication capacity is a critical piece of preparing for detecting and responding to infectious disease threats The International Health Regulations IHR establish risk communication the real time exchange of information advice and opinions between experts or officials and people who face a threat to their survival health and economic or social well being

as a core capacity that World Health Organization member states must fulfill to strengthen the fight against these threats. Despite global recognition of the importance of complying with IHR, 67 percent of signatory countries report themselves as not compliant. By investing in communication capacity, public health and government officials and civil society organizations facing health crises would be prepared to provide advice, information and reassurance to the public as well as to rapidly develop messages and community engagement activities that are coordinated and take into account social and behavioral dynamics among all sectors. To learn about current national and international efforts to develop the capacity to communicate effectively during times of infectious disease outbreaks and to explore gaps in the research agenda that may help address communication needs to advance the field, the Forum on Microbial Threats of the National Academies of Sciences, Engineering and Medicine convened a 1.5 day workshop on December 13 and 14, 2016 in Washington, DC. Participants reviewed progress and needs in strengthening communication capacity for dealing with infectious disease threats for both outbreaks and routine challenges in the United States and abroad. This publication summarizes the presentations and discussions from the workshop.

Global Health Risk Framework National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2016-05-11. Since the 2014 Ebola outbreak, many public and private sector leaders have seen a need for improved management of global public health emergencies. The effects of the Ebola epidemic go well beyond the three hardest hit countries and beyond the health sector. Education, child protection, commerce, transportation and human rights have all suffered. The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats, many of which could disrupt global health and commerce far more than the recent outbreak. In order to explore the potential for improving international management and response to outbreaks, the National Academy of Medicine agreed to manage an international, independent, evidence-based, authoritative, multistakeholder expert commission. As part of this effort, the Institute of Medicine convened four workshops in summer of 2015 to inform the commission report. The presentations and discussions from the Governance for Global Health Workshop are summarized in this report.

Post-Pandemic Social Studies Wayne Journell, 2021-12-24. The authors in this volume make the case that COVID-19 has exposed deficiencies in much of the traditional narrative found in social studies textbooks and state curriculum standards. They offer guidance for how educators can use the pandemic to pursue a more justice-oriented critical examination of contemporary society.

Teaching Social Issues in the Middle Grades Selma Wassermann, 2021-06-05. *Teaching Social Issues in the Middle Grades: A Teacher's Guide to Using Case Studies to Promote Intelligent Inquiry* provides a collection of ten cases for use in the middle grades that focus on many of the critical social issues we face today. It also includes materials to enable teachers to become more skilled in using case teaching methods. The cases and the teaching strategies are designed to develop students' appreciation for their roles and responsibilities in relation to social and civic affairs and help them develop the critical thinking abilities to prepare them as competent and concerned
