Designing User Interfaces for Hypermedia

Wolfgang Schuler,Jörg Hannemann,Norbert Streitz,2013-11-11 One can observe that a wide range of human activities involves various forms of design Especially if the goal implies the creation of an artifact design is at the very center of these activities It is the general understanding in the public to place design especially in the context of for example fashion furniture household items cars and architecture or in a more general way at the intersection of art and engineering Of course in the field of information technology developers of software and hardware are called system designers Design can be identified and considered in the context of many activities related to publishing creating a product ad in a magazine designing the layout of a newspaper authoring a book Summarizing these examples as creating documents these are activities where two challenges with respect to design have to be met Designing the content its structure and its relationship to the existing knowledge of potential readers is one while the other refers to the rhetorical aspects including designing the presentation of the material in order to communicate the content Publishing is communicating knowledge Moody's International Manual ,1996 *Hiram B. Vehicular Networks and Communications Anand Paul,Naveen Chilamkurti,Alfred Daniel,Seungmin Rho,2016-09-02 **Intelligent Vehicular Network and Communications** Fundamentals Architectures and Solutions begins with discussions on

how the transportation system has transformed into today's Intelligent Transportation System (ITS). It explores the design goals, challenges, and frameworks for modeling an ITS network, discussing vehicular network models, technologies, mobility management architectures, and routing mechanisms and protocols. It looks at the Internet of Vehicles, the vehicular cloud, and vehicular network security and privacy issues. The book investigates cooperative vehicular systems, a promising solution for addressing current and future traffic safety needs, also exploring cooperative cognitive intelligence with special attention to spectral efficiency, spectral scarcity, and high mobility. In addition, users will find a thorough examination of experimental work in such areas as Controller Area Network protocol and working function of On Board Unit, as well as working principles of roadside unit and other infrastructural nodes. Finally, the book examines big data in vehicular networks, exploring various business models, application scenarios, and real-time analytics, concluding with a look at autonomous vehicles. It proposes cooperative cognitive intelligent vehicular networks, examines how intelligent transportation systems make more efficient transportation in urban environments, and outlines next-generation vehicular networks technology.
