Transcending the Speed of Light Marc Seifer, 2008-08-13 A study of the new scientific understanding of consciousness and the mind as a fifth dimension of reality Introduces the existence of a fifth dimension one of mind an inner or hyperspace where time is transcended Shows how the barrier of the speed of light is actually a gateway demarking the fifth dimension Since the introduction of Descartes dualism in the seventeenth century the mind and the physical world have been viewed as disconnected entities Yet qualities of mind such as awareness purposeful action organization design and even decision making are present within the structure of matter and within the dimensions of space and time The space time continuum of scientists generally ignores the realm of the mind though phenomena such as imaginary numbers used by Einstein to combine space with time are concepts that only exist in the mind Marc Seifer contends that the inadequacy of four dimensional models to account for our experience of mental phenomena points to the consciousness of the mind as a higher organizing principle a fifth dimension where thoughts are as real and quantifiable as our familiar physical world He shows that because thought enables us to move backward and forward through time reflecting on the past and making plans for the future this fifth dimension of mind breaks the laws of relativity thereby transcending the speed of light His extensive study of this fifth dimension ranges from relativity and ether theory to precognition telepathy and synchronicity all from the perspective of the conscious universe *Four Days in November* Vincent Bugliosi, 2008-05-17 A book for the ages Los Angeles Times Book Review Four Days in November is an extraordinarily exciting precise and definitive narrative of the assassination of President John F Kennedy on November 22 1963 by Lee Harvey Oswald It is drawn from Reclaiming History The Assassination of President John F Kennedy a monumental and historic account of the event and all the conspiracy theories it spawned by Vincent Bugliosi legendary prosecutor of Charles Manson and author of Helter Skelter For general readers the carefully documented account presented in Four Days is utterly persuasive Oswald did it and he acted alone

darts a rifle that shoots around corners exploding clams samurai swords karate chops poisoned umbrellas and a fuel laden light aircraft Sometimes even a regular gun These are just some of the methods that have been used over the last forty years to speed four thousand VIPs to a premature end *Wolves Jackals and Foxes* is not an encyclopedia of assassination but rather a gripping history that charts the development of the modern world through the eyes of the assassins that tried to alter it An experienced investigative reporter Kris Hollington exposes shocking unknown stories of assassination Surprising conspiracies and remarkable connections are uncovered throughout Hollington relates the story of the man who shot Uday Hussein seventeen times the remarkable career of the CIA's black sorcerer reveals how an East German Stasi agent an American B movie actress and a Saudi prince conspired to commit one of the most important assassinations of the twentieth century uncovers the terrible history of South Africa's brutal assassination squad and exposes for the first time the secret society that ensured racist assassins in the South never paid for their crimes It also features previously classified information from the Secret Service including the story of how President Jimmy Carter was saved from a sniper's bullet by a rabid swamp rabbit This book is the first to study in detail not only the causes and surprising consequences of assassination but also the crucial seconds of the act itself and the psychology of the killer in an effort to understand why some assassinations succeed where others fail and what might be done to prevent them It is also the first book to examine the fascinating facts and figures of assassination revealing everything from the success rate by type of weapon and the escape and survival rates of assassins to the most popular time of year and location for an attack The definitive book on assassination *Wolves Jackals and Foxes* shows that sometimes one murder can change the world *Who was who in America* Marquis Who's Who, 1943 **Arts &**
