

Fallingwater

Frank Lloyd Wright, 1935-1937

Fort Pitt, Pennsylvania, USA, 1935-37

Frank Lloyd Wright designed Fallingwater as the most daring domestic residence in American architectural history. He began the project in 1935, at a time when the architectural establishment was still largely dominated by the traditional styles of the past. Wright's design was a radical departure from the norm, as it integrated the house with the natural environment. The house was built on a rocky outcrop over a waterfall, and its design was a direct result of Wright's vision of organic architecture. The house was built with a series of cantilevered concrete slabs that extended over the waterfall, creating a sense of continuity between the interior and exterior spaces. The design was a bold statement of Wright's architectural philosophy, which emphasized the integration of human habitation with the natural world.
