Transactions of the American Institute of the City of New-York, for the Year ... American Institute of the City of New York, 1860. **Stitching the 24-Hour City** Seo Young Park, 2021-06-15. Stitching the 24 Hour City reveals the intense speed of garment production and everyday life in Dongdaemun, a lively market in Seoul, South Korea. Once the site of uprisings against oppressive working conditions in the 1970s and 1980s, Dongdaemun has now become iconic for its creative economy, nightlife, fast fashion factories, and shopping plazas. Seo Young Park follows the work of people who witnessed and experienced the rapidly changing marketplace from the inside. Through this approach, Park examines the meanings and politics of work in one of the world's most vibrant and dynamic global urban marketplaces. Park brings readers into close contact with the garment designers, workers, and traders who sustain the extraordinary speed of fast fashion production and circulation, as well as the labor activists who challenge it. Attending to their narratives and practices of work, Park argues that speed, rather than being a singular drive of acceleration, is an entanglement of uneven paces of life, labor, the market, and the city itself. Stitching the 24 Hour City exposes the under-studied experiences with Dongdaemun, fast fashion, peeling back layers of temporal politics of labor and urban space to record the human source of the speed that characterizes the never-ending movement of the 24-hour city.

Transactions of the American Institute of the City of New York American Institute of the City of New York, 1860. 1st 32d. 1841-1871. 72 issued also as Legislative documents. **Machine Learning and the City** Silvio Carta, 2022-05-17. Machine Learning and the City explores the applications of machine learning and artificial intelligence to the built environment. Machine Learning and the City: Applications in Architecture and Urban Design delivers a robust exploration of machine learning (ML) and artificial intelligence (AI) in the context of the built environment. Relevant contributions from leading scholars in their respective fields describe the ideas and techniques that underpin ML and AI, how to begin using ML and AI in urban design, and the likely impact of ML and AI on the future of city design and planning. Each section couples theoretical and technical chapters, authoritative references, and concrete examples and projects that illustrate the efficacy and power of machine learning in urban design. The book also includes an introduction to the probabilistic logic that underpins machine learning, comprehensive explorations of the applications of machine learning and artificial intelligence to urban environments, practical discussions of the consequences of applied machine learning, and the future of urban design. Perfect for designers approaching machine learning and AI for the first time, Machine Learning and the City: Applications in Architecture and Urban Design will also earn a place in the libraries of urban planners and
