

MACROECONOMIC POLICY, CREDIBILITY, AND POLITICS BY TORSTEN PERSSON AND GUIDO TABELLINI*

David Rosenblatt**

Macroeconomic Policy, Credibility and Politics is meant to serve as a graduate textbook and literature survey of the recent advances in modelling government economic policy making. It is extremely successful in achieving both goals, unifying many of the different approaches to endogenizing government policy, one of the most active areas of macroeconomic theorizing in recent years. In addition to summarizing this literature, the "monograph," as the authors call it, presents some new results.

Before the emergence of this new literature, the policymaker was treated like "a machine," in the authors' words, that could be simply "programmed." One would model how the economy would respond to any exogenously determined values of the policy variables, and one would then calculate the optimal policy rules. The new approach assumes that the policymaker is a "rational and maximizing agent, or collection of agents, who respond to incentives and constraints just like the rest of the economy." The authors note that one can describe the new approach in terms of the principal-agent problem, where the many principals are the public, and the agent is the government. Some of the various articles in the literature analyze how the principals, acting in their "political role," impose political constraints on the government's policy decision, while other articles examine how the principals, acting in their "economic role," impose credibility constraints on the policy decision.

The monograph is organized in two parts: the first part analyzes monetary policy, and the second part looks at fiscal policy, more specifically the problems of wealth taxation and the accumulation of government debt. For economists unfamiliar with the literature who
