Macroeconomics 2e Charles Jones:

Macroeconomic Theory Jean-Pascal Benassy, 2011-05-12 This graduate textbook is a primer in macroeconomics. It starts with essential undergraduate macroeconomics and develops in a simple and rigorous manner the central topics of modern macroeconomic theory including rational expectations, growth, business cycles, money, unemployment, government policy, and the macroeconomics of nonclearing markets. The emphasis throughout the book is on both foundations and presenting the simplest model for each topic that will deliver the relevant answers. The first two chapters recall the main workhorses of undergraduate macroeconomics: the Solow-Swan growth model, the Keynesian IS-LM model, and the Phillips curve. The next chapters present four fundamental building blocks of modern macroeconomics: rational expectations, intertemporal dynamic models, nonclearing markets, and imperfect competition and uncertainty. Later, the book deals with growth, notably the Ramsey model, overlapping generations, and endogenous growth. Chapter 10 moves to the famous real business cycles (RBC) which integrate in a unified framework growth and fluctuations. The final chapters look at the issue of stabilization: how best to guard the economy from shocks and the connections between politics and the macroeconomy. To make the book self-contained, a mathematical appendix gives a number of simple technical results that are sufficient to follow the formal developments of the book.

Applied Intermediate Macroeconomics Kevin D. Hoover, 2012 A complete course in applied macroeconomics at the intermediate level that emphasizes the application of economic theory to real world data and policy.

Fundamentals Of Economics For Business (2nd Edition) John Smithin, David Barrows, 2008-10-30 Fundamentals of Economics for Business is an innovative text designed specifically for students in business education programs. It provides a comprehensive yet accessible introduction to the key economic issues relevant to present or future business decision makers. Reflecting the requirements of globalization, the content is international in scope and is applicable worldwide. The material is easily adaptable to courses of different lengths and educational objectives, including a one-semester MBA course, economics courses in an undergraduate commerce or business degree, or an executive MBA program. This second edition adds significant new material on production costs, managerial economics, growth, and competitiveness, and includes new case studies with applications to international business.

Long-Run Growth Forecasting Stefan Bergheim, 2008-03-29 This book explores how to set up an empirical model that helps with forecasting long-term economic growth. GDP forecasts for the years 2006 to 2020 for 40 countries are derived in a transparent way. Offering a systematic approach to models of potential GDP that can also be used for forecasts of more than a decade, it fills the wide gap between the high demand for such models by banks, international organizations, and governments on the one hand and the limited supply on the other hand. Frequent forecast failures in the past (e.g., Japan 1990, Asia 1997) and the heavy economic losses they produced motivated the work. The book assesses the large number of theories of economic growth, the drivers of economic growth, the available datasets, and the empirical methods on offer. A preference is shown for evolutionary models, and an

augmented Kaldor model The book uses non stationary panel techniques to find pair wise cointegration among GDP per capita and its main correlates Union Wage Bargaining and Economic Growth Jörg Lingers,2012-09-03 Writing a book is not possible without the generous input of many people It is a pleasure to have the opportunity to thank at least some of these people Prof Dr Jochen Michaelis the supervisor of my dissertation taught me how to do economic analysis and initiated my interest in labour market issues Discussions with him have always been enlightening and have greatly improved the analysis in this book Moreover he always encouraged me when I experienced a slump in my motivation He never lost his calmness and good temper not even in situations when my need for discussion must have been bothering him Thanks for that Jochen I m indebted to Prof Dr Peter Weise for taking over the job as the second referee of my thesis He gave very valuable comments and sacrificed his christmas holiday to write the referee report as fast as possible I also want to thank Prof Stefan Voigt and Prof Dr Reinhold Kosfeld the other two members of the dissertation committee for the discussion during the defence of the thesis *Commodities* H.
