Made To Break Technology And Obsolescence In America:

Made to Break Giles Slade, 2006-04-15 Listen to a short interview with Giles Slade Host Chris Gondek Producer Heron the contest for market dominance between GM and Ford the struggle for a national communications network the development of electronic technologies and with it the avalanche of electronic consumer waste that will overwhelm America's landfills and poison its water within the coming decade History reserves a privileged place for those societies that built things to last forever if possible What place will it hold for a society addicted to consumption a whole culture made to break This book gives us a detailed and harrowing picture of how by choosing to support ever shorter product lives we may well be shortening the future of our way of life as well Big Disconnect Giles Slade, 2012-08-07 Smart phones and social media sites may be contemporary fixations but using technology to replace face to face interactions is not a new cultural phenomenon Throughout our history intimacy with machines has often supplanted mutual human connection This book reveals how consumer technologies changed from analgesic devices that soothed the loneliness of a newly urban generation to prosthetic interfaces that act as substitutes for companionship in modern America The history of this transformation helps explain why we use technology to mediate our connections with other human beings instead of seeking out face to face contact Do electronic interfaces receive most of our attention to the detriment of real interpersonal communication Why do sixty million Americans report that isolation and loneliness are major sources of unhappiness The author provides many insights into our increasingly artificial relationships and a vision for how we can rediscover genuine community and human empathy **Made to Break** Giles Slade, 2009-06-30 Made to Break is a history of twentieth century technology as seen through the prism of obsolescence Giles Slade explains how disposability was a necessary condition for America's rejection of tradition and our acceptance of change and impermanence This book gives us a detailed and harrowing picture of how by choosing to support ever shorter product lives we may well be shortening the future of our way of life as well **Consumer Society** Barry Smart, 2010-03-25 Electronic Inspection Copy available for instructors here What factors are contributing to the continuing growth in consumption of goods and services At what point do the costs associated with consumerism begin to call our way of life into question How are the problems of resource depletion waste and pollution and environmental impact being addressed What is to be done about the consequences of our all consuming way of life Ever increasing consumption and a relentless pursuit of growth in output are the twin pillars on which the modern economy and contemporary social life rest But the consumer way of life is globally unsustainable We can't all live the consumer dream This comprehensive lively and informative book will quickly be recognized as a benchmark in the field It brings together a huge set of resources for thinking about the development of consumer culture its defining features and global consequences Adept in handling a complex range of classical and contemporary theoretical sources the book draws on an impressive range of comparative material and provides a variety of contemporary examples to inform and enhance understanding of our consuming way of life

Smart writes with verve and feeling and has produced a stimulating book that enlarges our understanding of consumer culture and provides a timely critical analysis of its consequences Clear engaging and original this book will be essential reading for all those interested in and concerned about our global culture of consumption including researchers and students in sociology politics cultural studies economics and social geography **My River Chronicles** Jessica DuLong,2009-09-08

and Philosophy of Technology Mark Thomas Young,Mark Coeckelbergh,2024-03-18 What can we learn about the nature of technology by studying practices of maintenance and repair This volume addresses this question by bringing together scholarship from philosophers of technology working at the forefront of this emerging and exciting topic The chapters in this volume explore how attending to maintenance and repair can challenge and complement existing ways of thinking about

Aesthetics of Care Yuriko Saito, 2022-07-14 Building upon her previous

work on everyday aesthetics Yuriko Saito argues in this book that the aesthetic and ethical concerns are intimately connected in our everyday life Specifically she shows how aesthetic experience embodies a care relationship with the world and how the ethical relationship with others whether humans non human creatures environments or artifacts is guided by aesthetic sensibility and manifested through aesthetic means Weaving together insights gained from philosophy art design and medicine as well as artistic and cultural practices of Japan she illuminates the aesthetic dimensions of various forms of care in our management of everyday life Emphasis is placed on the experience of interacting with others including objects a departure from the prevailing mode of aesthetic inquiry that is oriented toward judgment making from a spectator s point of view Saito shows that when everyday activities ranging from having a conversation and performing a care act to engaging in self care and mending an object are ethically grounded and aesthetically informed and guided our experiences lead to a good life

Living Wisdom, Revised and Expanded David G. Benner, 2019-07-24 Much more than knowledge or even understanding
wisdom is seeing life through the eyes of an awakened heart and transformed consciousness Rather than being the result of
the accumulation of information wisdom comes from acquiring a new mind Buddhists speak of this new mind as
enlightenment The Christian name for it is the mind and heart of Christ This is the basis of wisdom Wisdom is grounded in a
deep awareness of the sacredness and interconnectedness of everything in existence It is living in alignment with the
creative Spirit of Wisdom who inhabits all of creation and is our truest and deepest self It is learning to participate in God s
transformational agenda of cosmic whole making this being the way in which everything that exists becomes whole in Christ
This book does not offer gems of wisdom Instead it seeks to facilitate the awakening of your heart and transformation of your
consciousness that will allow wisdom to flow your from depths Actor-Network Theory at the Movies Björn

Sonnenberg-Schrank, 2020-01-29 This book is one of the first to apply the theoretical tools proposed by French philosopher
Bruno Latour to film studies Through the example of the Hollywood Teen Film and with a particular focus on Actor Network
Theory ANT the book delineates how Teen Film has established itself as one of Hollywood s most consistent and dynamic
genres While many productions may recycle formulaic patterns there is also a proliferation of cinematic coming of age
narratives that are aesthetically and politically progressive experimental and complex The case studies develop a Latourian
film semiotics as a flexible analytical approach which raises new questions not only about the history types and tropes of teen
films but also about their aesthetics mediality and composition Through an exploration of a wide and diverse range of
examples from the past decade including films by female and African American directors urban and rural perspectives and
non heteronormative sexualities Actor Network Theory at the Movies demonstrates how the classic Teen Film canon has
been regurgitated expanded and renewed Waste Wars Alexander Clapp, 2025-02-25 A globe trotting work of relentless

investigative reporting this is the first major book to expose the catastrophic reality of the multi billion dollar global garbage
trade Dumps and landfills around the world are overflowing Disputes about what to do with the millions of tons of garbage

hustle trash across thousands of miles and multiple oceans But no matter the scale one thing is true about almost all of them
few people have any idea they re happening Journalist Alexander Clapp spent two years roaming five continents to report
deep inside the world of Javanese recycling gangsters cruise ship dismantlers in the Aegean Tanzanian plastic pickers whistle

blowing environmentalists throughout the jungles of Guatemala and a community of Ghanaian boys who burn Western cellphones and televisions for cents an hour to tell readers what he has figured out While some trash gets tossed onto roadsides or buried underground much of it actually lives a secret hot potato second life getting shipped sold re sold or smuggled from one country to another often with devastating consequences for the poorest nations of the world Waste Wars is a jaw dropping expos of how and why for the last forty years our garbage the stuff we deem so worthless we think nothing of throwing it away has spawned a massive globe spanning multi billion dollar economy one that offloads our consumption footprints onto distant continents pristine landscapes and unsuspecting populations If the handling of our trash reveals deeper truths about our Western society what does the globalized business of garbage say about our world today And what does it say about us
