Labelled Deduction David Basin,M. D'Agostino,Dov M. Gabbay,Seán Matthews,Luca Viganò,2012-12-06 Labelled deduction is an approach to providing frameworks for presenting and using different logics in a uniform and natural way by enriching the language of a logic with additional information of a semantic proof theoretical nature Labelled deduction systems often possess attractive properties such as modularity in the way that families of related logics are presented parameterised proofs of metatheoretic properties and ease of mechanisability It is thus not surprising that labelled deduction has been applied to problems in computer science AI mathematical logic cognitive science philosophy and computational linguistics for example formalizing and reasoning about dynamic state oriented properties such as knowledge belief time space and resources

Solar Energy Applications to Dwellings Willeke Palz,C. den Ouden,2012-12-06 The objectives of the Modelling Sub Group are to unify European research in the field of computer models to provide the best simplified models in the Passive Solar Working Group s extensive European Passive Solar Handbook and to ensure that these simple models are easy to use for design purposes It has defined the needs of the research program for a large model and has chosen the Scottish program ESP as a large simulation model to be used as a

reference for the analysis of the simplified ones Each participant has commissioned the chosen model on his own computer and run a very simple exercise just to verify that the program works similarly on the different machines The analysis of the large model is being brought on its different sections such as input output heat transfer passive solar systems etc The group will run ESP using the same passive solar building data as inputted to simplified models to assess the sensitivity of the latter ones It will report on the work needed for the next 4 year CEC research program
