Vromen,2016-11-25 This book considers the radical effects the emergence of social media and digital politics have had on the way that advocacy organisations mobilise and organise citizens into political participation It argues that these changes are due not only to technological advancement but are also underpinned by hybrid media systems new political narratives and a new networked generation of political actors The author empirically analyses the emergence and consolidation within advanced democracies of online campaigning organisations such as MoveOn 38 Degrees Getup and AVAAZ Vromen shows that they have become leading political advocates and influential on both national and international level governance The book critically engages with this digital disruption of traditional patterns of political mobilisation and organisation and highlights the challenges in embracing new ideas such as entrepreneurialism and issue driven politics It will be of interest to advanced students and scholars in political participation and citizen politics interest groups civil society organisations e government and politics and social media *Routledge Handbook of the Climate Change Movement* Matthias Dietz,Heiko Garrelts,2014-01-10 This handbook provides a comprehensive overview of the growing transnational climate movement A dual focus on climate politics and civil society provides a hitherto unavailable broad and systematic analysis of the current global movement highlighting how its dynamic and diverse character can play an important role in environmental politics and

climate protection The range of contributors from well known academics to activist scholars look at climate movements in the developed and developing world north and south small and large central and marginal The movement is examined as a whole and as single actors thereby capturing its scope structure development activities and influence The book thoroughly addresses theoretical approaches from classic social movement theory to the influence of environmental justice frames and follows this with a systematic focus on regions specific NGOs and activists cases and strategies as well as relations with peripheral groups In its breadth balance and depth this accessible volume offers a fresh and important take on the question of social mobilization around climate change making it an essential text for advanced undergraduates postgraduate students and researchers in the social sciences

Ecocritical Concerns and the Australian Continent Beate Neumeier, Helen Tiffin, 2019-11-08 Ecocritical Concerns and the Australian Continent investigates literary historical anthropological and linguistic perspectives in connection with activist engagements The necessary cross fertilization between these different perspectives throughout this volume emerges in the resonances between essays exploring recurring concerns ranging from biodiversity and preservation policies to the devastating effects of the mining industries to present concerns and futuristic visions of the effects of climate change Of central concern in all of these contexts is the impact of settler colonialism and an increasing turn to indigenous knowledge systems A number of chapters engage with questions of ecological imperialism in relation to specific sociohistorical moments and effects probing early colonial encounters between settlers and indigenous people or rereading specific forms of colonial literature Other essays take issue with past and present constructions of indigeneity in different contexts as well as with indigenous resistance against such ascriptions while the importance of an understanding of indigenous notions of care for country is taken up from a variety of different disciplinary angles in terms of interconnectedness anchoredness living country and living heritage

Quarterly Essay 79 The End of Certainty Katharine Murphy, 2020-09-07 What has the coronavirus pandemic revealed about Scott Morrison and where is he taking Australia Epidemics are mirrors What has COVID 19 revealed about Australia and about Scott Morrison and his government In this gripping essay Katharine Murphy goes behind the scenes to tell the story of the response to the crisis Drawing on interviews with Morrison Brendan Murphy Josh Frydenberg Sally McManus and other players she traces how the key health and economic decisions were taken Her account is twinned with a portrait of the prime minister She explores his blend of pragmatism and faith and shows how a leader characterised by secrecy and fierce certainty learnt to compromise and reach out with notable exceptions Now as the nation turns inwards and unemployment rises our faith in government is about to be tested anew What does We re all in this together truly mean Will Morrison snap back to Liberal hardman or will he redefine centre right politics in this country Morrison s a partisan blue team to the core but his political philosophy is hard to pin down because it is predominantly trouble shooting By instinct Morrison is a power player and a populist not a philosopher a repairer of walls not a writer of manifestos his conservatism is extreme pragmatism in defence of what he regards as the core

of the nation Katharine Murphy The End of Certainty **Flooded Forest and Desert Creek** Matthew Colloff, 2014-08-11 The ecology and life history of the most widely distributed species of Eucalyptus in Australia the river red gum **Die internationale Klimabewegung** Matthias Dietz, Heiko Garrelts, 2013-07-05 Die Klimabewegung ist eine erst vor wenigen Jahren entstandene soziale Bewegung Zu ihren Mitgliedern zählen Nichtregierungsorganisationen NGOs Netzwerke Aktivisten und andere Akteure Sie engagieren sich auf lokaler nationaler und internationaler Ebene gegen die gesellschaftlichen Ursachen des Klimawandels und für die gerechte Eindämmung seiner Folgen Auch aufgrund ihrer vielfältigen Akteure und Aktionsformen ist die Klimabewegung bereits heute zu einem wichtigen Faktor für die Zukunft des Politikfelds herangewachsen Das Handbuch gibt einen aktuellen und systematischen Überblick über das noch junge Forschungsfeld über die Klimabewegung als Gesamtkonzept wie auch ihre wichtigsten Akteure und Strukturen Verschiedene methodische und theoretische Zugriffe werden genutzt sowie ausgewählte Länder in Fallstudien untersucht Das Handbuch ist eine Einladung und erste Anlaufstelle für alle die sich grundlegend mit den Formen der Klimabewegung ihren Herausforderungen und Chancen befassen wollen **How to Change Minds About Our Changing Climate** Seth B. Darling, Douglas L. Sisterson, 2014-07-29 The book to spark action on the defining challenge of our time In our post truth world there is only one place to turn to if we want to live in reality science And the research on climate change is clear It is real it threatens us all and human activity is the primary cause This essential handbook dismantles all the most pernicious misunderstandings spread by deniers and replaces them with the truth Faced with an imperiled planet that we must urgently work to save we don't have time for anything else **The New Climate War** Michael E. Mann, 2021-02-02 A renowned climate scientist shows how fossil fuel companies have waged a thirty year campaign to deflect blame and responsibility and to delay action on climate change and offers a battle plan for how we can save the planet Recycle Fly less Eat less meat These are some of the ways that we've been told can slow climate change But the inordinate emphasis on behaviour is the result of a marketing campaign that has succeeded in placing the responsibility for fixing climate change squarely on the shoulders of individuals Fossil fuel companies have followed the example of other industries deflecting blame think Guns don't kill people people kill people or greenwashing Meanwhile they've blocked efforts to regulate or price carbon emissions have run PR campaigns aimed at discrediting viable alternatives and have abdicated their responsibility to fix the problem they've created The result has been disastrous for our planet In The New Climate War Mann argues that all is not lost He draws the battle lines between the people and the polluters fossil fuel companies right wing plutocrats and petro states And he outlines a plan for forcing our governments and corporations to wake up and make real change including a common sense attainable approach to carbon pricing and a revision of the well intentioned but flawed currently proposed version of the Green New Deal allowing renewable energy to compete fairly against fossil fuels debunking the false narratives and arguments that have worked their way into the climate debate and driven a wedge between even those who support climate change solutions and

combatting climate doomism and despair mongering With immensely powerful vested interests aligned in defence of the fossil fuel status quo the societal tipping point won't happen without the active participation of citizens everywhere aiding in the collective push forward This book will reach inform and enable citizens everywhere to join this battle for our planet
