Heritage As An Asset For Inner City Development An Urban Managers Guidebook:

Heritage as an Asset for Inner-city Development Jean-Paul Corten, Ellen Geurts, Paul Meurs, Remco Vermeulen, 2014 How do we utilize a city's existing qualities for a vital future? How do we reverse the increasing threats that can be felt in all historical inner cities? What is the economic significance of heritage for a city that wants progress? What possibilities and limitations does heritage offer for the challenges we continually face in our design assignments? These are the central questions of this book. Heritage is playing an increasingly emphatic role in the development of the contemporary city. It is an important location determining factor for a new generation of city dwellers, newly developing companies in the service sector and creative industries and also for recreation and tourism. At the same time, unrestrained urban growth is putting historic inner cities under increasingly greater pressure. Accordingly, it is time for a new orientation toward the historic city. **The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific** Kapila Silva, 2019-12-23 The Routledge Handbook on Historic Urban Landscapes in the Asia Pacific sheds light onto the balancing act of urban heritage management focusing specifically on the Asia Pacific regions in which this challenge is imminent and in need of effective solutions. Urban heritage while being threatened amid myriad forces of global and ecological change provides a vital social, cultural and economic asset for regeneration and sustenance of liveability of inhabited urban areas worldwide. This six-part volume takes a critical look at the concept of Historic Urban Landscapes, the approach that UNESCO promotes to achieve holistic management of urban heritage through the lens of issues, prospects and experiences of urban regeneration of the selected geo-cultural context. It further discusses the difficult task that heritage managers encounter in conceptualizing, mapping, curating and sustaining the plurality, poetics and politics of urban heritage of the regions in question. The connective thesis that weaves the chapters in this volume together reinforces for readers that the management of urban heritage considers cities as dynamic entities, palimpsests of historical memories, collages of social diversity, territories of contested identities and sites for sustainable liveability. Throughout this edited collection, chapters argue for recognizing the totality of the eco-cultural urban fabric, embracing change, building social cohesion and initiating strategic socio-economic progress in the conservation of Historic Urban Landscapes. Containing thirty-seven contributions written by leading regional experts and illustrated with over 200 black and white images and tables, this volume provides a much-needed resource on Historic Urban Landscapes for students, scholars and researchers. *Enhancement of Public Real-estate Assets and Cultural Heritage* Lucia Della Spina, Francesco Calabrò, 2021-01-21 The management of cultural heritage and public real estate assets is one of the most crucial challenges concerning the sustainable use of these resources, involving dynamic methods to stimulate preservation, development, renewal and transmission to future generations of these essential assets. The contributions presented in this book provide a rich and varied panorama of research experiences and innovative tools capable of promoting the re-use of cultural heritage in European cities and cultural landscapes using a circular economy logic as a model of

sustainable development From this point of view cultural capital becomes the driver of a regeneration process on the local urban and metropolitan scales in which the transversal interconnections between the production cycles of the adaptive re use of the available heritage both in the adaptation and in the management phase configure a circular process of multidimensional production of value Therefore future territorial redevelopment projects can base their idea strength on an open system of appropriately selected social attractors whose enhancement and use have the objective of triggering widespread regeneration effects on the whole territory of influence receiving inducement and resources to progress

operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

Local Sustainable Urban Development in a Globalized World Dr Lauren C Heberle, Dr Susan M Opp, 2012-11-28 Sustainable development is a key issue of concern to urban planners across the globe How it is defined implemented and measured at the local level remains highly contested and subject to a wide range of external cultural political and economic pressures Bringing together leading experts from North America Europe the Middle East and SE Asia this book provides a timely overview of the various methods for understanding and implementing sustainable practices at local levels In doing so they present the wide range of local action alternatives available to planners that may be pursued in spite of the constraints generated by globalization processes and highlight the array of public policy options that could reduce the external pressures shaping the possible local alternatives The book argues that while local planners and local authorities are willing to act many are unaware of the range of options available to them In bringing together these case studies not only diverse in geographic terms but also reflecting very different levels of income general population education cultural norms legal systems and government structures it points out innovations and examples of best practice

Cities and the Arts Roger L. Kemp,2004-11-12 Citizens nonprofit organizations and local public officials in increasing numbers are using the arts and culture as vehicles to improve their downtowns as well as to enhance general economic conditions within their communities Public officials especially are learning that they can plant the seeds of urban renewal and at the same time promote their city s culture and arts This not only renews their neighborhoods and downtowns but also attracts tourists and private investment A new eclectic economic development model has evolved and is beginning to work in a number of politically economically racially and culturally diverse communities throughout America From Atlanta and Reno to Philadelphia and Seattle this work

includes numerous case studies that demonstrate the ways in which cities and towns are now using the arts to stimulate both downtown and neighborhood revitalization The future of the arts in cities is also examined Five appendices are included as well Cities with Arts Cultural and or Entertainment Districts in the United States Regional Resource Directory National Resource Directory National Directory of State Art Agencies and National Directory of Regional Arts Organizations

China ,1993-01-01 The Republic of Korea s industrial policy has directed that nation s economy through nearly three decades of spectacular growth But the authors of this paper maintain that this policy is showing signs of being outmoded The time has come the authors argue for the Korean government to stop managing the economy s structural development and to redefine the responsibilities of business and government Under this proposed compact the allocation of resources would shift from the government to the private industrial and financial sectors The transformation of the government bureaucracy from an ad hoc policy role to one of a transparent and predictable regulator is a key to the success of this undertaking These new directions would present the government with enormous challenges Greater competitive discipline and regulatory oversight would be required While dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the momentum of savings and investment For comparison the study examines the industrial economies of France Germany Japan and the United States which underwent similar shifts
