Kinship In Europe Approaches To Long Term Development 1300 19:

Kinship in Europe David Warren Sabean, Simon Teuscher, Jon Mathieu, 2007 Since the publication of Philippe Ariès book *Centuries of Childhood* there has been great interest among historians in the history of the family and the household The essays in this text explore two major transitions in kinship patterns at the end of the Middle Ages and at the end of the 18th century

Administrating Kinship: Marriage Impediments and Dispensation Policies in the 18th and 19th Centuries Margareth Lanzinger, 2023-05-08 From the late eighteenth century more and more men and women wished to marry their cousins or in laws This aim was primarily linked to changes in marriage concepts which were increasingly based on familiarity Wealthy as well as economically precarious households counted on related marriage partners Such unions however faced centuries old marriage impediments Bridal couples had to apply for a papal dispensation This meant a hurdled lengthy and also expensive procedure This book shows that applicants in four dioceses Brixen Chur Salzburg and Trent took very different paths through the thicket of bureaucracy to achieve their goal How did they argue their marriage projects How did they succeed and why did so many fail Tenacity often proved decisive in the end

Sibling Relations and the Transformations of European Kinship, 1300-1900 Christopher H. Johnson, David Warren Sabean, 2011-03-01 Recently considerable interest has developed about the degree to which anthropological approaches to kinship can be used for the study of the long term development of European history From the late middle ages to the dawn of the twentieth century kinship rather than declining as is often assumed was twice reconfigured in dramatic ways and became increasingly significant as a force in historical change with remarkable similarities across European society Applying interdisciplinary approaches from social and cultural history and literature and focusing on sibling relationships this volume takes up the challenge of examining the systemic and structural development of kinship over the long term by looking at the close inner familial dynamics of ruling families the Hohenzollerns cultural leaders the Mendelssohns business and professional classes and political figures the Gladstones in France Italy Germany and England It offers insight into the current issues in kinship studies and draws from a wide range of personal documents letters autobiographies testaments memoirs as well as genealogies and works of art

The Spanish Habsburgs and Dynastic Rule, 1500-1700 Elisabeth Geevers, 2023-06-19 Providing a novel research methodology for students and scholars with an interest in dynasties at all levels this book explores the Spanish Habsburg dynasty that ruled the Spanish monarchy between c 1515 and 1700 Instead of focusing on the reigns of successive kings the book focuses on the Habsburgs as a family group that was constructed in various ways as a community of heirs a genealogical narrative a community of the dead and a ruling family group These constructions reflect the fact that dynasties do not only exist in the present as kings queens or governors but also in the past in genealogies and in the future as a group of hypothetical heirs This book analyses how dynasties were made by the people belonging to them It uses a social institutionalist framework to analyse how family dynamics gave rise to practices and roles The kings of Spain

only had limited power to control the construction of their dynasty since births and deaths processes of dynastic centralisation pressure from subjects relatives individual agency rivalry among relatives and the institutionalisation of roles limited their power Including several genealogical tables to support students new to the Spanish Habsburgs this book is essential reading for all students of early modern Europe and the history of monarchy The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Visions of Kinship in Medieval Europe Hans Hummer, 2018-04-26 What meaning did human kinship possess in a world regulated by Biblical time committed to the primacy of spiritual relationships and bound by the sinews of divine love In the process of exploring this question Hans Hummer offers a searching re examination of kinship in Europe between late Roman times and the high middle ages the period bridging Europe's primitive past and its modern future *Visions of Kinship in Medieval Europe* critiques the modernist and Western bio genealogical and functionalist assumptions that have shaped kinship studies since their inception in the nineteenth century when Biblical time collapsed and kinship became a signifier of the essential secularity of history and a method for conceptualizing a deep prehistory guided by autogenous human impulses Hummer argues that this understanding of kinship is fundamentally antagonistic to medieval sentiments and is responsible for the frustrations researchers have encountered as they have tried to identify the famously elusive kin groups of medieval Europe He delineates an alternative ethnographic approach inspired by recent anthropological work that privileges indigenous expressions of kinship and the interpretive potential of native ontologies This study reveals that kinship in the middle ages was not biological primitive or a regulator of social mechanisms nor was it traceable by bio genealogical connections In the Middle Ages kinship signified a sociality that flowed from convictions about the divine source of all things and which wove together families institutions and divinities into an expansive eschatological vision animated by the most righteous principle of love

Blood and Kinship Christopher H. Johnson, Bernhard Jussen, David Warren Sabeau, Simon Teuscher, 2013-01-01 The word blood awakens ancient ideas but we know little about its historical representation in Western cultures Anthropologists have customarily studied how societies think about the bodily substances that unite them and the contributors to this volume develop those questions in new directions Taking a radically historical perspective that complements traditional cultural analyses they demonstrate how blood and kinship have constantly been reconfigured in European culture This volume challenges the idea that blood can be understood as a stable

entity and shows how concepts of blood and kinship moved in both parallel and divergent directions over the course of European history

authorities it examines the tensions within the emancipation process between participation and exclusion The book argues that the racial laws from 1938 did not represent the sudden end of an idyllic integration but rather the climax of a long term development Social marginalization the persecution of Jewish rights and the assault on Jewish lives during fascism are analysed distinctly from the perspective of Jewish women In spite of their significant influence on the transnational orientation of the Italian women s movement their emancipation as women and Jews remained incomplete

A Delicate Choreography David Sabeau, 2023-10-24 The origins of the incest taboo have puzzled many of the most influential minds of the West from Plutarch to St Augustine St Thomas Aquinas Martin Luther David Hume Lewis Henry Morgan Sigmund Freud Emile Durkheim Edward Westermarck and Claude Lévi Strauss This book puts the discussion of incest on a new foundation It is the first attempt to thoroughly examine the rich literature from philosophical theological and legal treatises to psychological and biological genetic studies to a wide variety of popular cultural media over a long period of time The book offers a detailed examination of discursive and figurative representations of incest during five selected periods from 1600 to the present The incest discussion for each period is complemented with a presentation of dominant kinship structures and changes without arguing for causal relations Part I deals with the legacy of ecclesiastical marriage prohibitions of the Middle Ages Historians dealing with the Reformation have wondered about the political and social implications of theological debates about the incest rules the Enlightenment opted for sociological considerations of the household and a new anthropology based on the passions Baroque discourse focused upon sexual relations among kin by marriage while Enlightenment and Romantic discussions worried the intimacy of siblings The first section of Part II deals with the six decades around 1900 during which European and American cultures obsessed about the sexuality of women Almost everyone concurred in the idea that mother made the family what it was that she configured the household kept the lines of kinship vibrant and stood at the threshold as stern gatekeeper and many thought that she managed these tasks through her sexuality and an eroticized relationship with sons Another story line taken up in the section Intermezzo this one about the physical and mental consequences of inbreeding appeared after 1850 To what extent do close kin marriages pose risks for progeny At its center lay the incest problematic now restated Is avoidance of kin genetically programmed Do all cultures know about risks of consanguinity As for the twenty first century evolutionary and genetic assumptions are challenged by a living world population containing roughly one billion offspring of cousin marriages Part III deals with one of the perhaps most remarkable reconfigurations of Western kinship in the aftermath of World War I The shift from an endogamous to an exogamous alliance system centered on the nuclear family An historical anomaly this family form began to dissolve almost as soon as it came together and in the process shifted the focus of incest concerns to a new pairing father and daughter By the 1970s when the father daughter problematic swept all other considerations of incest aside that relationship had come to be modeled for the most part around power and its abusive potential As for incest its representations in the last three decades of

the twentieth century no longer focused on biologically damaged progeny but rather on power abuses in the nuclear family sexual abuse By the mid 1990s Western culture at least partly redirected its gaze away from father and daughter towards siblings especially towards brothers and sisters and the sexual boundaries and erotics of their relationships Correspondingly siblings became a model organism for psychotherapy evolutionary biology and the science of genetics **Housing Capital**

Simone Derix, Margareth Lanzinger, 2017-10-23 Throughout history houses have been an economic resource as much as a means of social political and cultural agency From the early modern period to the 20th century the multifaceted capital of houses linked individuals families and societies in specific ways The essays collected here probe the material texture of past societies concerning the inheritance value sale or maintenance of houses as well as the symbolic meanings that houses conveyed **4**
